Introduction

In this course, you are going to begin solo auditing on the actual New Era Scientology processes. We are going to do it on a gradient.

It is a bit tricky because there are two concepts that you need to understand – at least to understand them well enough to be able to recognize them in session. They are: “Static” and “Point of Equilibrium”.

These two are not that easy to get, but don’t worry much, because you will learn more about them in doing the auditing than in just reading about them.

All I am asking you is to get at least a concept about these terms.

For the experienced auditors, I included all the references in the “Appendix” part at the end of this pack.

For the beginning solo auditor, I put only the needed excerpts of the theory taken from the book *Scientology Infinity*, which is a beginning book.

And for the technique, I added some explanations for you to be able to run the process.

I will have you run one set of commands at a time. Then you’ll send me your worksheets and what happened. Then I can coach you on whatever comes up.

Regarding the following theory, just read it and ask me any question you want.

The Static

*A **static** as defined in physics would be something that is entirely at rest or has nothing affecting it.*

Meaning that when an object or a person is in a complete balance with the environment or with other objects, and there is a complete lack of motion or effort used — then the object or person is motionless or at a total stop.

So, if a parked car is not moving at all — it is static or at rest.

Now that is the definition of static in physics, but we have a completely different meaning when it comes to the mind, spirit, and life.

A STATIC IS CONSIDERED TO BE SOMETHING THAT HAS NO FORM, NO ENERGY, AND NO LOCATION IN TIME OR SPACE.

Static energy is a type of spiritual or thought energy that life and the human spirit are composed of: it is simultaneously everywhere and nowhere at the same time.

Static permeates the entire universe and is the basic thing upon which it is built.

The concept of static is self-evident when we choose to look for it within ourselves and in the lives of others around us.

It has remained mostly undetected and has not been extensively researched because it is hard to do so with something that is considered to not be there in the first place.

Modern-day science seems to have a lot of difficulties with understanding things that are not there — even though it is their job to do so.

The way this all corresponds to the mind is that static energy has all the qualities of actual energy like electricity — while not actually having those qualities — so there is an infinite capacity for memories to be stored and then accessed at a later date.

What is most commonly taught is that the human mind is a physical brain and it is where we do all of our thinking and where memories are stored over time.

Think about this, though.

If the human mind were strictly physical, there would be no place to store all the memories and experiences that we have accumulated over an entire lifetime.

We would be using a brain with 1 gigabyte of memory to store and access an entire lifetime worth of memory (120 terabytes).

There were scientific studies done by neurologists as early as the 1950s that concluded if each cell in the human brain were to store just one memory — then due to the size of the average brain a person would only have about eight days' worth of memory.

That is not the exact figure given in the studies but demonstrates there must be some other explanation for how the mind stores experiences and memories.

The idea that the mind is just a brain does not stand to reason or make any common sense.

So, the other explanation is the mind is a combination of the four parts that were discussed earlier in this chapter, and they are all composed of this static energy.

More importantly, the mind is also a part of what is referred to or known as the spirit.

*In Scientology (the study of how to know things) we have used for a long time the term **THETAN** to describe what a human spirit is.*

Thetan meaning thought, spirit, or life-force.

While there are many common denominators between some of the discoveries made in Scientology and other practices; more of a scientific approach than relying on faith or belief alone was used in the research of the mind and the human spirit, so, the term thetan was adopted instead.

The term separates the discoveries made regarding the spirit in modern times from things like mysticism, spiritualism, and other religious teachings of the ages.

So, this thing we call the mind that we use to think with is essentially the human spirit and composes who we are as a person.

Further, each one of us is an immortal spiritual being that is composed of this static life-force or thought energy.

Though the most important discovery ever made regarding the mind and the spirit and how to use this discovery to help people improve themselves — is how static forms or is created.

It is probably one of the greatest secrets ever uncovered and just by knowing this information your life can change for the better!

LRH

The Law of Unification

What is the secret that I have been speaking about?

*It is the **Law of Unification**, and it can be described as follows.*

At any point in time where a person or an object (or multiple people and objects) have a mutual impact in common that has enough force to produce any pain, unconsciousness, or discomfort there is a point — only if this point is a fraction of a second — where all opposing forces will equal zero.

And a total equilibrium or balance will occur.

Simultaneously, creating a static force that has a complete absence of matter, energy, space, and time; but is infinite and has all the potential qualities of matter, energy, space, and time. (Also known as MEST.)

Therefore, following the Law of Conservation of Energy — the theory where nothing in our universe is ever destroyed but just alters its form and becomes something else — the destruction of any MEST will forever exist, in potential, as a static that parallels and contains all of the initial forces of the moment of original impact.

The above may take a little bit of time to learn, but there is no way to present this theory except by doing so in its complete form.

With a few practical examples and a bit of explanation, you should be able to grasp this concept and gain a practical understanding of how it can affect us in our daily lives.

Let us say an Olympic runner decides he is going to run as fast as he possibly can into a brick wall.

He starts running, and sure enough, he runs straight into a wall and hits it head-on.

As a result, he knocks himself completely unconscious, loses half of his teeth, and breaks his jaw from hitting the wall at full speed.

Looking at this situation it would not be obvious that there is any type of balance — let alone a moment of no motion — but there is.

It is only hard to spot because we cannot usually see things that happen so quickly and on such a small scale.

The point of balance occurs right between this runner hitting the wall and after having done so.

What we are looking at here is a static point that forms at the exact moment that this guy hits the wall while running into it.

It may only take a fraction of a second to hit, but static energy records everything that takes place around this runner the moment he does.

It is the point at which the analytical mind slightly or completely shuts down, and the reactive mind takes over and records what goes on.

Here is what forms unconsciousness as we know it.

As a result, something in the environment or life can approximate what took place in a past situation and alter a person's behavior.

It can also happen that we do this to ourselves by putting our attention back on an incident unknowingly or knowingly.

Have you ever met someone that is always talking about the same bad experience for days on end while never doing anything about it?

And as time goes on it only seems to get worse for them instead of better?

Well, this is because every time they think about what happened to them in the past, there is a static portion of the incident recreated along with the rest of it.

Eventually, it becomes so real to the person that it is all that they can think about because they now have thousands of copies of the same mental image picture.

Luckily, this is reversible by having a person locate and view the points of balance or unbalance within these incidents and uncovering the static portions within them.

Once this occurs, they erase and no longer bother a person as they have been converted to raw experience and ability.

.

Solo Auditing Practical

(Excerpts from HCO BULLETIN OF 15 SEPTEMBER 2018 New Era Scientology)

How to properly run NEST (New Era Scientology for Thetans)

(Note: NEST became NES later on)

By equilibrium, it is meant the exact point at which all total opposing forces are equal. When this occurs, it is also when theta or static itself is formed and takes upon all the same qualities and character of these opposing forces. This appears to be the cause of all mental phenomena continuing to exist long after it has occurred in the physical universe. By uncovering all of these forces and then spotting the exact point of equilibrium when it was formed...

Unlike any form of processing that has come before it, New Era Scientology can be used to run any engram, secondary, implant, ridge, or entity interdependently of alike phenomena and manifestations in both the bank or composite case.

The auditor queries and finds out what the person is in or would like to handle and then runs it through the procedure.

It can be done once or twice through for a repair, and then left off with no liability of being underrun or overrun and without keying in the person and leaving things unflat.

If a full resolution is being aimed for, then; the process is simply done in whole repetitively until the person under auditing originates an absolute certainty and an understanding of the fact that a full resolution has occurred.

When inquiring about what an individual needs to have handled or is currently stuck in; the hottest thing that you can have is something that is F/Ning. It means the majority of the charge has already been gotten off and is what the individual has the most reality on. This is only done provided that they still have attention on it and are interested in resolving it. Which is the direct result of static charge remaining in the incident etc.

So, the degrees of reads here are the F/N, null needle, and then an actual read itself. It may sound a bit odd, but with this form of processing, we are approaching things from the top and not the bottom of the scale. When put into this perspective — it makes perfect sense.

Another critical factor is that with running what matter, energy, space, and time are connected to the said difficulty: it is essential to ensure that all of these are run in turn to an F/N and cog. Enabling an unburdening of the case so that the person is then able to spot the exact point of equilibrium. Which then brings about a complete as-issness and duplication of what is being addressed.

Make sure you understand the theory above. Tell the instructor you are ready or if you have any question.

The first command is there to locate approximately a point of equilibrium regarding the subject you want to handle. You are not going to have a clear picture of what happened. It is rather a feeling of something in suspension in time or space – a feeling of something unmoving, standing there. Sometimes, you have no visio at all, it is just black. Don't worry, trust yourself and spot what seems to be static.

New Era Scientology Commands

INSTRUCTIONS: After each command, ask **“How would you word that?”**. It appears to have the effect of increasing the power and the efficiency of processing by 80%.” LRH (HCOB 20 DECEMBER 2018) – see appendix.

With the instructor, go over a subject you have your attention on or would like to handle on any dynamic.

Go in session. Ask question 1 regarding the subject you took up. Just spot what comes to you (do not invalidate any answer you get. Don't think but look for a point of equilibrium).

If any uncertainly stop the session and contact the instructor. Don't worry, this is a tricky point when you are not used to.

If all is fine, just go onto Q2 and 2a.

1. **Can you locate a point of equilibrium regarding _____?”**
“How would you word that?”
2. **“What objects are connected to that?”**
“How would you word that?”
- 2a. **“Are there any other objects connected to that?”**
“How would you word that?”

(Run repetitively until F/N, V.G.I'S, and COG. **The F/N is not called.**)

End off the session and send the result to the instructor.

When ready, do the same with the next commands.

3. “What energy is connected to that?”

“How would you word that?”

3a. “Is there any other energy connected to that?”

“How would you word that?”

(Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

4. What space is connected to that?”

“How would you word that?”

4a.) “Is there any other space connected to that?” “

How would you word that?”

(Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

5. “What time is connected to that?” “

How would you word that?”

5a.) “Is there any other time connected to that?”

“How would you word that?”

(Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

6. “What experiences are connected to that?”

How would you word that?”

6a.) “Are there any other experiences connected to that?”

How would you word that?”

(Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

7. Now spot the exact point of equilibrium in that. (Run repetitively until F/N, V.G.I’S, and COG. The F/N is now called.)

Here are two excerpts from HCO BULLETIN OF 5 OCTOBER 2018 ADDITIONS TO RUNNING NEST. This is how to run the last command.

Over the last two weeks, I have discovered the original recall mechanism for a thetan would appear to be merely spotting something.

On some level, a thetan knows all things even if he cannot view them in a degraded state. The thetan only has to observe what it chooses to by locating it within time and space. It is that simple.

When running the NEST procedure give the commands and take whatever the PC's attention goes to. Have them continually spot the point of equilibrium in what they are viewing, even if it does not read. It may need to be spotted upwards of 15-20 times, but the needle will eventually begin to open up and read. It will then finally BD or culminate in multiple LFBD's on average of .2 to .5 DIV's of TA on average. Or more.

The Law of Unification

It can be described as follows:

AT ANY POINT IN TIME WHERE A PERSON OR AN OBJECT (OR MULTIPLE PEOPLE AND OBJECTS) HAVE A MUTUAL IMPACT IN COMMON — THAT HAS ENOUGH FORCE TO PRODUCE ANY PAIN, UNCONSCIOUSNESS, OR DISCOMFORT — THERE IS A POINT — IF ONLY FOR A FRACTION OF A SECOND — WHERE ALL OPPOSING FORCES WILL EQUAL ZERO — AND A TOTAL EQUILIBRIUM OR BALANCE WILL OCCUR. SIMULTANEOUSLY — CREATING A STATIC FORCE THAT HAS A COMPLETE ABSENCE OF MATTER, ENERGY, SPACE, AND TIME — BUT IS INFINITE — AND HAS ALL THE POTENTIAL QUALITIES OF MATTER, ENERGY, SPACE, AND TIME. (Also known as MEST.)

Therefore — following the *Law of Conservation of Energy* (the theory where nothing in our universe is destroyed but just alters its form and becomes something else) the destruction of any MEST will forever exist — in potential — as a static that parallels — and contains — all of the initial forces of the moment of the original impact.

Intelligence and the Assignment of Significance in Dianetic and Scientology Processing

I believe that after all of these years I can adequately answer *why* all form of Dianetics and Scientology processing work. Conversely, this would theoretically also explain at what point that processing breaks down and does not work so well.

FOR ANALYTICAL THOUGHT TO TAKE PLACE AND AN ASISNESS TO OCCUR A SIGNIFICANCE *MUST* BE ASSIGNED TO AN UNKNOWN.

You may notice that this is one of the rare times in my writing I have used the word *must*. I have done so to stress the importance of the role that this small little datum plays in all of what we do.

No matter what type of auditing is being delivered the additional step of merely asking a PC “How would you word that?” appears to have the effect of increasing the power and the efficiency of processing by 80%.

Anything that cannot be viewed is an unknown, and it will remain that way until it is viewed and a significance is assigned to it that is based upon the reality of the person viewing it.

Roughly 95% of the universe is composed of dark matter and energy while only 5% of what we term as matter comprises the rest. It appears that this also corresponds to mental mass and energy as well, meaning that 95% of our awareness and potential exists as anti-matter or a black matter that we have just begun to tap into.

It is in this state because it is an unknown and it is only necessary to assign significance to it for us to increase our awareness level.

So, if a guy is being audited that has been hit over the head with a rock, it is important to ask him how he would word what has occurred to him. While in just mechanically going through it, he may say he was hit over the head with a rock, while on further inspection by query from the auditor, he may say that he was struck with a “stone.”

This one little inaccuracy is the make-it-or-break-it point and is the balance between significance and havingness that makes any process work.

Give it a shot, and you may be amazed at the results. I have recently incorporated this principle into a series of Expanded Grade V processes so that anyone may see for themselves in the field.

HCO BULLETIN OF 15 SEPTEMBER 2018

New Era Scientology

After two lifetimes, over 100,000 hours of research, and as a result of the efforts of myself and many others — I believe that the endgame of scientology has finally come into view. It is with much excitement and joy that I can firmly announce a discovery that may be the very root of all life itself and how it is created in the physical universe. A development of such importance that not too far in the distant future I believe we will all find ourselves on the cusp of an entirely new wave of technological advancements.

With another golden age to soon follow here on Earth.

This discovery does not come without its price. I'm going to need a lot of help, and it is going to be a lot of work on our part to get this tech in on the planet. It may very well redefine the subject of scientology as we know it and how we have all come to view the world and the universe at large. Towards that end, I am offering up this pilot here for all capable individuals and practitioners so that they may apply it.

It is with the highest level of ARC and love that I offered to you now — New Era Scientology.

New Era Scientology Commands

8. **Can you locate a point of equilibrium regarding _____?”**

2. **“What objects are connected to that?”**

2a. **“Are there any other objects connected to that?”** (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

3. **“What energy is connected to that?”**

3a. **“Is there any other energy connected to that?”** (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

4. **What space is connected to that?”**

4a.) **“Is there any other space connected to that?”** (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

5. **“What time is connected to that?”**

5a.) **“Is there any other time connected to that?”** (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

6. **“What experiences are connected to that?”**

6a.) **“Are there any other experiences connected to that?”** (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

7. **Now spot the exact point of equilibrium in that.** (Run repetitively until F/N, V.G.I’S, and COG. The F/N is now called.)

How to properly run NEST (New Era Scientology for Thetans)

(Note: NEST became NES later on)

By equilibrium, it is meant the exact point at which all total opposing forces are equal. When this occurs, it is also when theta or static itself is formed and takes upon all the same qualities and character of these opposing forces. This appears to be the cause of all mental phenomena continuing to exist long after it has occurred in the physical universe. By uncovering all of these forces and then spotting the exact point of equilibrium when it was formed — an as-isness of an as-is takes place.

Unlike any form of processing that has come before it New Era Scientology can be used to run any engram, secondary, implant, ridge, or entity interdependently of alike phenomena and manifestations in both the bank or composite case. The auditor queries and finds out what the person is in or would like to handle and then runs it through the procedure. It can be done once or twice through for a repair, and then left off with no liability of being underrun or overrun and without keying in the person and leaving things unflat.

If a full resolution is being aimed for, then; the process is simply done in whole repetitively until the person under auditing originates an absolute certainty and an understanding of the fact that a full resolution has occurred.

When inquiring about what an individual needs to have handled or is currently stuck in; the hottest thing that you can have is something that is F/Ning. It means the majority of the charge has already been gotten off and is what the individual has the most reality on. This is only done provided that they still have attention on it and are interested in resolving it. Which is the direct result of static charge remaining in the incident etc.

So, the degrees of reads here are the F/N, null needle, and then an actual read itself. It may sound a bit odd, but with this form of processing, we are approaching things from the top and not the bottom of the scale. When put into this perspective — it makes perfect sense.

Another critical factor is that with running what matter, energy, space, and time are connected to the said difficulty: it is essential to ensure that all of these are run in turn to an F/N and cog. Enabling an unburdening of the case so that the person is then able to spot the exact point of equilibrium. Which then brings about a complete as-issness and duplication of what is being addressed.

I have given only a brief explanation of how to apply this amazing new technology. The full data on its development and application will soon follow, but for now, this stuff is so hot that it needs to be put immediately into the field to see just how far reaching it is.

That being said let us get it done, shall we? I believe it is high time that we take back what is ours and to change this planet for the better!

Good luck.

HCO BULLETIN OF 5 OCTOBER 2018

Additional points that should be taken into consideration when
running New Era Scientology for Thetans

Additions to running NEST

Over the last two weeks, I have discovered the original recall mechanism for a thetan would appear to be merely spotting something.

On some level, a thetan knows all things even if he cannot view them in a degraded state. The thetan only has to observe what it chooses to by locating it within time and space. It is that simple.

The only issue with this is many static points, or points of equilibrium have been formed over time due to impacts, etc. Which appear to be the root cause of all engrams, facsimiles, and other mental energy manifestations.

So, at the point where an impact occurs and equilibrium of forces is achieved; the above-mentioned mental masses are created with both mental and static charge as a part of their composition.

Whenever our attention is on one of these masses — or something in the environment approximates them — they are recreated. Becoming denser over time and pulling in a greater and greater amount of energy. It is an interaction of *static* energies in incidents and postulates. Not an interaction of *theta*(thought) energies as there is a marked difference between the two.

Probably the reason an engram or mass comes to be in chronic restimulation in the first place.

On all cases that were run on the NEST procedure, no matter the level, in asking them to spot a point of equilibrium they have invariably never failed to detect something. Not once.

Something always blows into view. There may be no read, and there may be no visio, but there is still a concept, a feeling, or an idea. It has nothing to do with the mind. The thetan goes right to it — and does so by spotting.

So, a thetan will go directly to the point of equilibrium asked for, and it *never* reads. The only time a read does occur is when they are near some aspect of an equilibrium (static). At which time a read can be observed on a meter.

A static has no energy or mass but does have an infinite *potential* of energy and mass. The static that is in an incident can then discharge against us. Producing a fall when attempting to view the *exact* point of equilibrium at its inception.

The higher potential static is what appears to be causing the electrical discharge phenomena in the mind. All other mental and physical universe masses are lesser in energy potential, so they are discharged against by this static energy.

Until now in auditing, we have only been getting the mental masses and charge off of a case. As soon as attention is put back onto any of these static points, it is recreated and mocked up again.

The odd point is that most cases which have gone clear mostly have *static* pictures. They do not move.

In any event, I will tell you how to get rid of the damn things instead of going into the comprehensive theory behind all of this. That will all come later at some point I am sure.

When running the NEST procedure give the commands and take whatever the PC's attention goes to. Have them continually spot the point of equilibrium in what they are viewing, even if it does not read. It may need to be spotted upwards of 15-20 times, but the needle will eventually begin to open up and read. It will then finally BD or culminate in multiple LFBD's on average of .2 to .5 DIV's of TA on average. Or more.

Keep them locating and spotting points of equilibrium, and you will see more case gain than ever believed possible. That is all.

New Era Scientology Processing Commands

1. "Can you locate a point of equilibrium regarding _____?"
2. "Is this your charge, another being's charge, or multiple beings charge?"
3. "I would like to indicate that this is (your, another being's, multiple beings) by-passed charge."
4. "Is this a point of equilibrium or unequilibrium?"
5. "Is that a point of equilibrium in matter, energy, space, time, or awareness?"
6. "I would like to indicate that it is a point of equilibrium in _____."

Or;

7. "Is this a point of unequilibrium in no-matter, no-energy, no-space, no-time, or no-awareness?"
8. "I would like to indicate that it is a point of unequilibrium in _____."

9. "Now spot the point of equilibrium in that again."

10. "Does that to seem to have blown?"

(If not)

11. "Is there an e/s point of equilibrium?"

12. "Now spot the point of equilibrium in the e/s event."

[Then start again from step 2 and continue.]

The procedure can be continued until:

a Minor EP (F/N, a small self-realization, and V.G.I's);

EP (F/N, with a cog related to the subject with some resolution, and V.G.I's);

or MAJOR EP (F/N, with major realization of the subject being run, the achievement of Universal Basic with complete certainty of resolution, and V.V.G.I's).

Ultimately, we are aiming for the latter, but the rest will do when faced with time-constraints or other circumstances. An EP can occur at any point in this procedure and if it does that is the point to leave off. Unless it is a minor EP and there are no barriers in auditing towards a MAJOR EP.

Another thing to note here is that at the same time a read occurs on the meter it is corresponding to the point of equilibrium in the pc's mind or universe. So if they have any difficulty in locating one, or when repetitively spotting one; then indicate a read no matter how small. It can be as little as a tick or a stop of the needle; but once indicated it tends to open up the dial and whatever is being run.

So, you cannot go wrong in indicating these as long as you never cut the pc's communication in the process.

So, there you have it! These are the most workable set of NEST commands and will produce case gain on the order of three-to-four times the amount of previous auditing. The wins and gains are also stable, and if a MAJOR EP is obtained, then you can add certainty to the mix.

Best of luck and this is the most potent tech that we have to date. So use it to the benefit of yourself and others — that is the real ticket.

Release, Overrun and Rehabilitation

It is not really a concern in New Era Scientology because the purpose is not a release but an erasure, a total resolution. However it is good to know about these data to understand the next HCOBs.

In Tech 1.0, apart from New Era Dianetics, all other auditing processes were designed to alleviate the charge. It was removed temporarily. This was the release. The charge was not erased but sent away.

What was happening regularly is the phenomenon known as overrun. The process was run too long, after the release.

The preclear would feel it and often was protesting on continuing the same process.

There were indicators like the Tone Arm going to the roof and the needle becoming totally stuck – really a mess.

There was a procedure to remove the charge called Rehabilitation or Rehab.

Basically, the rehab was putting back the attention of the pc to the release that was overlooked. Doing so, he was spotting the point and usually, the win and release was coming back to life and the TA going down with a floating needle.

I mention the point so that you learn to spot when the charge has blown so that you don't find yourself continuing to run what has gone.

And if you do, it is just easy to go back in the worksheet to notice where the trouble started and going back to the point where the charge has blown. Or you can just remember the point.

When your cycle of action is complete, it is complete. Spot it and don't go beyond.

Just for you to know.

INFINITY SERIES 9

Cognitions of a Different Sort

Cognitions have always been one of the essential factors in processing, but they have always varied case-to-case and based upon what is being run at the time. There is a possibility that a being's overall theta endowment may play a role in determining their quality as well.

Now, while the revelation of spending an entire life forgetting to put dirty socks in the clothes hamper can be considered to be a valid self-discovery — it is not a very far-reaching or particularly relevant one.

There are these types of cognitions, and then there are those that are directly related to the process and subject that one is running. Which are the most important and relevant of the two types of cognitions by far. For instance, “Oh! That’s the reason I have been terrible with communication all my life!” while being run on Grade 0.

With the discovery of infinity procedure, this is no longer a liability. Whatever difficult a pc or Pre-OT is having while being run on this procedure, usually causes a cognition on the exact reason why that particular difficulty is persisting, or why it occurs in the first place.

That is what we are aiming for in this type of processing. A stable cognition that relates directly to the cause of why something is persisting and occurring in present time.

Almost point-for-point with this procedure a person that we are auditing cognites with each command. So, if we are searching for and aiming towards the larger picture of why difficulty is occurring in the first place — and the procedure is stopped at the first cognition — good progress will not be made.

Oddly enough, this even applies to cognitions that have been viewed at some point in auditing, but never fully resolved. It is believed to be a result of not pulling these postulates in the first place and not having gone basic enough — that is to Universal Basic (the first time it occurred in this universe or another).

When applying this procedure keep one eye open to ensure that the person you are running is cogniting correctly. It produces the best results.

Subjective Cognitions

It is of fatal importance to ensure that a pc has a subjective-cognition — in conjunction with — every single end phenomenon in Scientology and Dianetics.

I cannot over-emphasize this point enough — as making this mistake — is as bad as putting a gun to a PC's head — and pulling the trigger.

They will not only fail to receive any case gain — but their case will become markedly worse — as time progresses.

What is meant by a subjective-cognition?

Simple — it means that a PC establishes a subjective reality between his cognition — and a present time difficulty — based upon the subject matter of a processing session.

If problems are being run in session — the pc will have a direct cognition on why they are having a problem — or that *particular* problem.

When communication is being addressed — a pc will have a cognition along the lines of — this is why they had difficulty with communication — or communicating on a given subject.

It is a direct A to B — or cause-and-effect — cognition.

From something that occurred along the whole track — to what is affecting them now in present time.

It is almost unnecessary to state this — and it was always implicit in auditing anyway — but there are a surprising number of individual authors who do not understand this thoroughly.

I have seen an auditor call a communications grade completion on a pc — who originated that they were hungry — and their needle happened to be floating.

So — always ensure that your PC's subjective reality — is directly proportional to — the cognition that they are having — and it is on the applicable auditing subject.

To not do so — is a great disservice to them — and will only cause more harm than good.

*THE FOLLOWING IS THE MOST WORKABLE FORM OF AN EP FOR NEW
ERA SCIENTOLOGY*

Physical Universe End Phenomena (P/Ep or P-Ep)

The end phenomena of New Era Scientology — has been established and observed to be — F/N, V.G.I's, EXTERIORIZATION, and SUBJECTIVE COGNITION.

In that exact order.

Objective End Phenomena

Scientology has now gotten into an area of technical application so refined that we are capable of producing OBJECTIVE END PHENOMENA or OEP's.

A phenomena that can be universally and uniformly observed in others would be an End Phenomena that far exceeds individual and subjective reality on something.

An EP with a corresponding ability gained that exists in the physical universe and is not just alive in the mind of the being itself.

This has a lot of ramifications because it means that we are starting to embark upon a journey that can only culminate in the discovery of all the abilities that will make things such as Extra Sensory Perception and telepathy possible.

Therefore, it is more appropriate to refer to such a phenomena as an Objective End Phenomena. It is one that can be observed and brought about by processing in each and every individual uniformly. Without major variation from case to case.

The only consideration we have in whether or not someone has achieved an OEP is where or not they can *physically* demonstrate the ability gained of a process, rundown, or level.

Objective End Phenomena – Part Two

There are a few things that should be added regarding what was written in HCOB 11 JANUARY 2020 about **Objective End Phenomena** and how it applies *subjectively*.

The way it works is like this.

Normally an auditor will have a PC in session and would be running a process until an F/N, COG, and VGI'S is achieved.

At which time the auditor would then indicate to the PC that the needle is floating on the meter and it was time to end session.

The only problem with this is it appears over eighty percent of the auditors today do not ensure that a PC gets the postulates off of a case and are not making certain that the EP the PC is having is *conducive and relevant* to the process that is being run in session.

For example:

We have an auditor running a communications process on Grade 0 and upon the PC saying that he is hungry and needs a peanut butter and jelly sandwich the auditor indicates the F/N and calls the session.

If you think that I am joking about this I am not.

I have actually seen this happen and have gleaned it from numerous worksheets over the last few years.

AND THIS IS NOT A DAMN EP OR COG!

What it is a giant joke and a major flap on the part of C/S's and auditors for ever letting it happen.

Fortunately, I have made some new technological breakthroughs that have led to each and every Scientology practitioner being able to produce an **OBJECTIVE END PHENOMENA** in session.

From here on out *nothing* else should be used in calling a session except for the following.

And if you are a PC or an auditor you are a damn fool if you do not heed this advice.

I usually never allow my case to effect what I write but on this one point I will make an exception and say this:

If a person does not do this, they are a criminal, guilty of a High Crime, and deserve to be shot!

That is that.

It is so vitally important that if you fail to utilize the OEP you will not produce any long-term result in auditing and will only create a being that is temporarily free and will one day mock up their Reactive Mind again.

That is a fact.

The two major out-points that have been discovered in Scientology are the lack of using the full EP of Dianetics *in* Scientology processing (mainly pulling and asking for the postulate in session) and erroneously calling COG's and EP's.

The way to avoid this is to use the OEP in determining when to end off a session or a process.

It applies best to the use of Technique 0 but can be achieved with previous Standard Tech as well.

Provided it is integrated properly and the OEP is used instead of the standard EP.

The Objective End Phenomena

DEFINITION:

AN OBJECTIVE END PHENOMENA CONSISTS OF AN OBJECTIVE COGNITION, EXTRAPOLATION, AND A RISINGFLOATING-NEEDLE.

An **OBJECTIVE COGNITION** is one that can be *observed* by not only the PC but the auditor and everyone else as well.

You can see the thing. It makes sense.

It is what qualifies the Objective Cognition and sets it apart from the standard cognition.

It is an A to B type of cognition where the PC is able to see why what happened to them 800 quadrillion years ago (the known relative time-frame of all existence) has effected them along the wholetrack and in present time.

The Objective Cognition then usually leads to an EXTRAPOLATION which can best be described as “seeing the whole scene in front of one.”

In mathematical terms an extrapolation means to plot points on a line or graph in order to predict more numbers or data beyond what is known.

It works the same way with the mind here.

Once a person has had an Objective Cognition they can then see from A to B and are exterior from all of the incidents and the data in-between them.

As a result of having brought all incidents, data, and postulates into a perfect balance or equilibrium this exterior viewpoint is obtained with the ability to know all of the data associated with it.

So in the same way a person can predict data on a graph far beyond a certain point a being can also *know* beyond just the A and B points mentioned above.

It should be said that these points can be composed of any MEST or point of awareness along the wholetrack plotted against time.

Which brings one to the real meat and potatoes of the OEP and that is the **RISING-FLOATING-NEEDLE**.

It is exactly what it sounds like.

A Rising Needle that is followed by a Fall or Long Fall Blown Down and then a Floating Needle.

It is all three of these reads in order, combined, and on a repeat basis.

The needle will rise, rise, rise... Fall or Blown Down once or more times... then go into a floating needle.

It will do this time after time and you can ask any processing command or about any major running item and it will not do anything but follow this pattern.

What the meter is mechanically demonstrating is that a certain range of charge that is being addressed via processing has been optimized and aligned perfectly between two extremes of completely negative and completely positive.

Those are both no-games conditions and are not what is wanted or is optimum in life or the universe.

On the other hand.

The point of balance or equilibrium would be a static being's native position on a subject or two extremes.

It further means that all charge that is either positive, negative, *or static* has been as-ised fully.

There is a big misconception that because something has been as-ised we should somehow forget it or not be able to see that again.

That is a lie.

If we have totally seen something *as-is* we have full recall, command, and use of it analytically.

We have only erased the *abberative* or *unknown* aspects which have been converted to conceptual and analytical experience.

So when you see the needle rising, rising, rising, the PC's analytical mind is confronting other *new* masses in the environment in order to remedy the Havingness of losing so much charge or masses in session.

The PC will continuously and unconsciously pull in masses unless this is remedied by running Assimilation, Empathy, or Interchange processing.

You can also run SDS processing for the static being itself but either will work just fine to remedy Havingness.

This is why the Falls and Long Fall Blowdowns always follow the Rising Needle.

As a being unknowingly pulls in mass from the environment it then blows off residual masses and charge that was addressed in session.

A Floating Needle then follows these Blows and it will generally sway three to four times back and forth before it begins to Rise again and repeat the whole process.

Two things can then happen here.

The auditor running a process can then remedy havingness until the needle goes null or end off session and let the PC's own bank sort it out of its own accord.

It will occur outside of session.

This is generally recommended as the life and livingness around the PC will dictate what they need and want and that is what they will pulled in on themselves.

The only time this would be ignored is in the circumstance of repairs or some sort of similar action.

The PC can then be run and have their havingness remedied and there will be no chance of *any* residual case restimulation.

To sum all of this up the Objective End Phenomena is an Objective Cognition, Extrapolation, and a Rising Floating Needle or **R-F/N**.

From here on out there is no other EP that is aimed for except this in determining when and where to end off a processing session.

This also applies to all major end phenomenons such as on the Grades and Pre-OT levels.

It is a high crime to do otherwise.

For the sake of yourself, your PC's, and Scientology. Do not forget it!
