HUBBARD NEW ERA SCIENTOLOGY CHECKSHEET

HCNES (Hubbard Certified New Era Scientologist)

PREREQUISITE: Provisional class IV.

ORGANIZATION: _____

STUDENT'S NAME: _____ POST: _____

DATE STARTED: _____ DATE COMPLETED: _____

This checksheet contains all of the data necessary to successfully deliver New Era Scientology processing on any case — at any level.

REQUIREMENTS:

Full Study Tech is to be used throughout this course.

Standard classroom Word Clearing methods are required.

The course is done fast flow per HCO PL 31 Aug 74 Issue II Fast Flow Training Reinstated.

It is recommended that Class IV and above be trained on this course after having read all basics and achieved the state of Clear — but concessions can be made as necessary — to get tech applied in the field.

CERTIFICATE:

Completion of this checksheet entitles you to a provisional “Hubbard Certified New Era Scientist” certificate.

A Provisional Certificate is only valid for one year — at which time it must be validated by me personally.

THE REASON WHY

The Principle Out-Points to Date with Scientology

The following are the Principle out-points to be found with Scientology processing and the Bridge to date.

They were found and discovered as a result of over three years of practical application — and research — into the current scene of Dianetics and Scientology.

They are not presented in any particular order of importance.

Avoid and disregard them — at your own peril.

1. Clear has been — and always was — only a key-out state (stable Clear is brought about by running Incident 0).
2. Meaning — that at one point or another — an individual would eventually mock-up a reactive mind all over again.

3. Lack of an active senior research and tech terminal here on Earth.
4. No active Source to mock-up the overall direction for Scientology and an organizational structure here on the planet.
5. A lack of training to match abilities gained on the Grade Chart.

While an individual may have been processed up to a certain Grade or OT Level — they are incapable of operating from that Grade or OT Level without training to match it — period!

6. Scientology has been taken so far off-purpose over the last thirty years — that its overall efficacy has been detrimentally impacted.
7. It would appear — that with each passing generation — the Standard Bridge is losing approximately twenty-five percent of its effectiveness.
8. This seems to stem from the fact that the reactive mind and case factors are constantly changing — and shifting — in present time.
9. OT III was a dramatization that took place later on the chain — of what has now become known as Incident 0 (the creation of the physical universe) — and is the mechanical mechanism responsible for keying-in the reactive mind again.
10. Running anything other than composite case after Clear — utilizing New Era Scientology processing and NOT (NOTS) — which only leads one to endlessly run circuits and entities without a subjective reality on actual case factors.

Doing so — has been shown to be almost fatal at times to one 's health and sanity — and the probable reason why so many have passed away from cancer after having run NOTS.

11. In addition to the ability to recall anything on the wholetrack if asked to do so (under auditing conditions) — a thetan apparently has the ability to natively utilized telepathy to a greater or lesser degree.

At least when it comes to communicating with other separate beings — that are not in meat bodies.

12. No way to foresee the above out-points — without thirty to forty years of practical application and observation in the field.
13. False and enforced human morality.

The way it basically works is — make sure you go to church every Sunday and worship your priest by humbling yourself at all times — while they diddle little children and steal all of the money from the coffers.

BUT — you must forgive them because they are only human — and it would be a sin for YOU to not do so.

Meanwhile — we should all support Jimmy the hobo because he sure does a great job standing on the corner with his sign — while some straight-A student cannot get a scholarship to go to college.

Jimmy the hobo is HUMAN — and it is the humane thing to do by supporting his endeavors — with someone else's hard-earned money.

I believe you get the point.

So — there you have it. Those are the principle out points that are currently facing us today — and they could be a hell of a lot worse.

At least we now know what they are — so we can begin to do something about them.

HCO POLICY LETTER OF 23 OCTOBER 2018

supersede
general distribution
forward

This policy letter is a summation of over two years of research into potential and major outpoints in Scientology and the upper OT levels of the Bridge.

THE FINAL ANALYSIS

A List of the Preexisting Outpoints in Scientology and its Technology

I have never been here to tell anyone what to do or what to think, but on the contrary, I have tried to teach and help others to speak and act for themselves. Though if there were ever a time in history that I would enforce things if I could do so, it would be on the data that I am about to share with you.

I would smack every person upside their head and tell them to get this and get it down cold!

Unfortunately, as much as I would love to emphasize this with the act of bopping heads, I cannot as it would not be ethical and would probably not accomplish much in the long run. I would urge you to take all of this into account though and to incorporate it into your practice and view of Scientology today.

This may not sound like a very definitive statement on my part but if there are any errors in the technology of Dianetics and Scientology then they are ultimately my own, and I accept responsibility for them. Instead, I am allowing every individual to make a personal choice when it comes to the information that is presented in this HCO P/L out of respect for the field and the many valiant efforts of auditors made over the years.

Now that being said there have been many flubs and misuses of the technology since my passing last lifetime. It is now time to outline what they are so that they may be rectified and we can all move on with things. These are all to be taken with a grain of salt, and to the degree that they have affected the practice of Scientology I cannot reasonably estimate at this time, but it can be stated that these things have been utterly disastrous and should be taken seriously.

Steps should then be taken to fix them and reverse this condition of Danger that the whole subject has fallen into in PT.

THE OUTPOINTS AS THEY CURRENTLY EXIST

1. The Church of Scientology.

Starting in 1973 the Church of Scientology was beginning to become infiltrated by numerous government agencies and shadow/deep government operatives (I was aware of this at the time due to my time as a Naval Intelligence Officer during WWII and the skillsets I obtained as a result) long before they were even known as such.

These were groups that are composed of not only human operatives but non-human ones as well, that appear to be human; but are only partly so or are half-breeds. No, I am not going to go into full conspiracy theory mode here, but suffice to say that there are approximately 88 races of what I referred to as invader forces in some of my earlier work but today are also known as extraterrestrials. They compose what has recently come to light as the Intergalactic Confederation: of which several individuals from the United

States government retain a seat on and is comprised of over 80 extraterrestrial races.

I have nothing against ET you follow me? But some basic facts need to be stated here so that this does not sound as insane as it already probably does. Those facts are that everything you hear about these days on such programs as Cosmic Disclosure and Coast to Coast AM radio (a late night talk show) is true; at least in part.

If you are so inclined, you can do your research on that note but don't end up going down a rabbit hole with it, or I may not be able to pull you out of it!

These forces mentioned above are the ones that ultimately co-opted and took over the Church of Scientology and today have hijacked the technology that we hold so dear (which I will get to in a moment).

If you walk into any of these orgs today, you are sure to find some buggy-eyed bastard staring at you suspiciously like you do not belong there — after all, you are only human!

So long story short, after the Operation Snow White fiasco (I ordered the Sea Org to infiltrate and run counter-intelligence operations on those agencies infiltrating the church) I knew that that particular fight had been lost and decided to take the tech any myself into hiding.

You know the rest, and that is the true story of what happened to the Church of Scientology.

2. OT III.

Is *THE* major outpoint in all of this and it is entirely my fault on this one; I failed to resolve certain case factors after clear and create a technology to do so. The methods for running OT III, while at the time being sound, ended up keying-in whoever ran it on a much earlier incident that exists before the creation of our universe.

As such, it had no time in it and was not accessible by conventional auditing procedures of the time. It was not until I began researching OT VIII, and then later OT IX, that would lead to my RETURN and the realization and discovery of it.

3. NOT'S (New Era Dianetics for OT'S)

Is not and was never meant to be a codified part of the Bridge. It was interjected into the upper levels of the Bridge to garner more money and prolonged running time on the action. It was also designed to cave people in and to make them more easily controlled.

4. OT VIII.

There isn't one. If anyone has run or claimed to run any version OT VIII, it is a High Crime and a blatant lie. (But is at this moment forgiven for those that did have the intention of delivering the tech to the best of their ability.

Many felt there was no other option in my absence, but there is now.

5. Super Power.

Oops! There isn't one of these either, and the above applies.

6. OT levels.

Knowing what we do now in Scientology, it would appear that the upper OT levels as they are known are backward. They have been inverted, where the incomplete OT VIII would be run as OT 1 and then what we came to know as NOT'S (composite case) would have been run as OT 2 etc.

Then again; we could be reversing time as well.

7. Offshoots.

All practices such as CBR (Captain Bill Roberts's Bridge) and TIR (Traumatic Incident Reduction) should be dumped in the toilet with early mornings breakfast.

8. Ethics.

Either they are not being applied or are being enforced which cannot take place for the tech to thrive. A lot of people have had bad experiences with this subject, so it can be expected to be a bit difficult to get ethics in, or to get others to agree to them, but they are designed to get the tech in and if they are not applied, then tech isn't either. Both go hand-in-hand.

9. No Source.

That is me, ladies and gentleman. It is hard not to sound conceited or arrogant here, but if you have not figured out by now that I AM and always WILL be Scientology, and that it doesn't function so well without me in power, there's not much I can say.

It is not as if I want the job, and as soon as someone does replace me, the better, but without the acknowledgment and supporting of a Source, this is all not going to happen. That is a fact.

CLOSING

These are the major outpoints that I have been able to identify over the last two years, and it is research that is hard-won as it was a complicated thing for me to personally experience and to see what the tech has become.

All is not lost, and we can still knock this one out of the park if we try to do so.

The out-points mentioned above are repairable now, and I believe that we are in another dimension entirely when it comes to Scientology processing than where we were many years ago. It currently only needs action on the part of diligent individuals such as us.

I will leave you with this. There have been times when even I have wanted to quit this game, and usually, I would never state such a thing in public or writing. Though it is the truth and do you know what got me through every time?

At the last possible moment when I think life could not get any worse, some woman, a girl, or a man would come up to me and smile. Maybe for no reason at all, or over the fact they are just excited at the prospect of being alive.

It is then, and in those moments that I am reminded of why it is that I do this.

So that despite what life throws at me I know that if I confront it, if for even a little longer, then a girl somewhere on this planet will have the chance to smile — at least one last time.

We do not do this for ourselves, but others; many do not have the awareness or the desire even to care.

For hell's sake! Never find yourself being one of them and help me to fix the above.

HCO POLICY LETTER 10 JULY 2019

supersede

general distribution

forward

The data found in this Policy Letter has always gone without saying — but due to the widescale failure in the field regarding the application of Keeping Scientology Working — it is necessary to lend some additional clarification.

The Lack of the Application of Logic

Many over the last few decades have apparently gotten into the habit of applying certain datums to the point of idiocy — in particular — the Keeping Scientology Working Series.

One thing we have never done and never will do in Scientology — *is indoctrinate people on what to do and when!*

That is not our job and is best left to people such as a psychiatrists and psychologists.

But it invariably seems to be the case when it comes to those who tout the term KSW 1 — where an almost bullheaded determination exists to put in this policy — without any regard for the application of technology itself — and is oftentimes done so by those who have not been in the chair for decades.

If it has gone without saying up until this point — I will go ahead say it now so there is no further confusion — that under no circumstances does the KSW Series supersede or cancel the practical application of technology in session — or the logics or axioms of Dianetics and Scientology.

Individual judgment and logic must be used at all times — inside and outside of session — in relation to Scientology.

Period!

For without practical application in session — the rest is less than worthless when it really comes down to it.

So make sure that you and everyone else is using their head when it comes to what you are doing — especially the tech.

INFINITY SERIES 1

THE AXIOM OF INFINITY

I have recently unearthed a previously undiscovered axiom which has allowed me to complete and unify the technology of Dianetics and Scientology.

THE QUALITY AND CHARACTER OF A THETAN CONSISTS OF A THETAN'S WHOLE TRACK EXPERIENCE.

The nature of this axiom is so fundamental and comprehensive that it has evaded detection for all of these years. It is quite revealing in that it aligns a lot of known and unknown data alike. This axiom has contributed to the development of a whole new series of technology and rundowns — including a completed OT 9.

It is best summarized like this. An individual thetan, usually, has had years of experience on the order of approximately eight-hundred quadrillion years or more. Consisting of many lives and bodies, or completely independent of bodies entirely, and including the many corresponding adventures that you can expect any being to get into while experiencing this.

So if a being's experience consists of being a warrior for a significant portion of the last trillion years or so — then being a warrior has shaped the individual experiences and characteristics of this being. It also shapes the

actual quality of theta itself including the viewpoint of the mind, spirit, and life. Relative to this being.

You will probably find this person down at the local bar tossing a few people around, or serving within the armed forces and “kicking ass and taking names.” Does this make them a terrible person? Probably not, but they would be susceptible to the same tendencies that are as a result of their own whole track experience. Coincidentally, this even applies to those individuals that have obtained the state of OT 8.

From all of the data that I have been receiving it seems that some individuals just cannot be helped. No matter how hard we try or how far they have gone along the bridge.

I am not talking about someone who is a PTS or SP, but one of the many OT 8's that claim they have never received a gain from Scientology in their life! Then there are those that go around in some sort of imaginary bubble while entirely oblivious to the world that surrounds them.

Which I have finally discovered through further research was a direct result of the above axiom.

There is a big difference between those who experience the benefits and gains of scientology and an *actual* scientologist who believes in and agrees with the philosophy as well. A true scientologist has experienced enough aberration and turmoil along the whole track — that when stumbling along scientology — they recognize the truth of the subject for what it is. They are then willing and prepared to make the self-determined choice to rise above it all and to help their fellow beings.

WITHOUT THIS I HAVE NEVER SEEN A BEING SUCCEED AND GO ALL THE WAY WITH SCIENTOLOGY.

That statement may seem a bit discouraging, and while it may seem impossible to change eons of experience and habit to have a completely free being, it isn't. Simply put, I have researched and discovered an entirely new

technique and procedure that appears to have infinite application. It is also more powerful than anything developed to date.

IT IS THE INFINITY PROCEDURE

Further, there appears to be one other state of being above OT that can be theoretically stated to be a True Static. So stay the course as things are about to change for the better. All of the hopes and dreams that we have worked so hard for are not only about to be realized — but surpassed.

Though study and understand the above first. You are going to need it!

INFINITY SERIES 2

ATOMICS REVISITED

To fully understand the basics of this new series of technology and where it fits at within the scientology bridge, it was necessary for me to return to some of my primary research that is covered in Scientology 8-8008. Specifically, my look into atomic physics that resulted in the discovery of the Be-Do-Have triangle and the axioms of scientology. There was a phenomenon that I had known about in the years following 1953, but could never codify into a process with uniform application and results.

Many Scientologists have wondered why they couldn't duplicate the same level of technical application and results as myself. The fact is that it was due to the phenomena mentioned above, which I was handling and applying without any awareness of actually doing so.

It comes down to this, theoretically:

ON THE ATOMIC LEVEL THERE ARE PROTONS WHICH CONSIST OF
A POSITIVE ELECTRICAL CHARGE (BUT ARE DENSER IN
WAVELENGTH AND LESSER IN ENERGY POTENTIAL)

THERE ARE ELECTRONS WHICH ARE NEGATIVE IN ELECTRIC CHARGE (BUT ARE LESSER IN DENSITY AND WAVELENGTH, WITH A GREATER POTENTIAL IN ENERGY)

THERE ARE NEUTRONS WHICH ARE IN FACT THETA PARTICLES (BEING NEUTRAL OR STATIC, WITH AN INFINITE ENERGY POTENTIAL)

These observations essentially demonstrate the actual reality of an Ether Theorem — which to put in layman's terms — was a belief in classical physics that there exists undetectable energy that permeates the entire Universe. Einstein's Theory of Relativity later overshadowed this theory, and there went the physical universe!

Though even with the advent of the atomic bomb. Science could never adequately explain how a massive amount of energy can result from the splitting of atoms, and why so much physical force is necessary to do so. The answer is quite simple because the energy released is a result of causing an implosion and explosion of the theta particles within the atoms themselves.

That is neither here nor there and has no bearing on the matter at hand. What is important to note is that if on the atomic level we can demonstrate that theta particles exist, then everything is genuinely interconnected on the subatomic level — whether it is theta or mest. The only difference is in the orders of magnitude of the energy itself. It only manifests itself in different forms and for different purposes.

In early 1952 I discovered a way to contact and utilize what I then believed to be the wavelength of static itself, but it was too dangerous of a technique for release and public application. At times it was even physically harmful, so I dropped it in favor of further research. Unknown to me at the time, once contacted, I never stopped utilizing this wavelength. While there were many physically damaging effects of this, pretty much all of my greatest cognitions and research came about as a result of its application. At the time I did not realize this, and by 1981 the damage had been done, and it was too late. This was the final leg of my research into the upper OT levels and the Fourth Echelon — that is still incomplete to this day.

Now this concept is quite deceitful on the surface and is the primary reason why atomic physics has been so ass-backward for so many years. For as magnitudes of energy are concerned a proton is, in fact, a condensed form of theta energy that has manifested itself as a mest particle over time. And an electron is closer in density and wavelength to a thought or a postulate. So we get the physical universe manifestation and apparency — that a proton is discharging *against* the electron — which is only partially correct.

The reason for this is that the mest particle (proton) is a collection of higher in potential theta particles (electrons). If a mest particle and a theta particle were of equal magnitude and density, you would find that the theta particle will discharge against the mest particle.

The probable reason for the two different fundamental theories on electricity to this day; after all, I have just recently discovered these factors myself.

Now, the actual key to all of this is the true static particle itself. Theoretically, a true static would be a theta particle or an actual thetan itself, that is in its native and pure state. A true static being is synonymous with the original definition of a static. The only difference being the degree of the quality of the static itself. It is pure and unenturbulated.

There has been a phenomenon around for many years known as resonant frequency, in which everything around us operates at a particular frequency. A sensor can be placed on any object and then can be hit with an object or a sound wave to determine what this "resonant frequency" is. If you were to use say, radio waves that approximate the same frequency as the object, it could then be caused to shake apart.

That is a simplified explanation of things, but this phenomenon needs to be conceptually understood to shed light on how a true static operates at the atomic or subatomic level and how it relates to auditing.

A STATIC - is an actuality of no mass, no wave-length, no position in space or relation in time, but with the quality of creating or destroying mass or energy, locating itself or creating space, and of re-relating time.

BUT THIS ONLY APPLIES TO A THETAN THAT IS IN ITS PURE AND NATIVE STATE OR APPROXIMATING IT.

All of this is easily understood if one realizes that anything and everything that we have ever done to ourselves or another we are still in connection with, and that it has changed and altered the essence of us as an actual being.

I lightly touched on this subject with the Axiom of Infinity. Located in Infinity Series 1 (HCO BULLETIN OF 25 NOVEMBER 2017 - INFINITY SERIES 1, THE AXIOM OF INFINITY).

So we have a theta being or particle that is capable of creating energy (thought) or mass, and this area of technology is already thoroughly addressed with the standard techniques of Dianetics and Scientology through processing. This leaves the fact that the true static being or particle has never been dealt with in its native state — or only in part.

What is known as theta appears to be a manifestation of true static that approximates mental or physical universe mest.

IN LIGHT OF THIS NEW DATA IT HAS BEEN DISCOVERED THAT PHYSICAL UNIVERSE MEST AND MENTAL MEST; ORIGINATE FROM, AND ARE COMPOSITE PARTS OF THE SAME SOURCE. TRUE STATIC.

Meaning that everything in the entire universe is interconnected via true static. Any adverse condition, whether it is the result of a case or composite case, is capable of being addressed on a new and different basis. By harnessing true static and approximating the thing one wishes to handle, it causes resonance to go out into the physical universe itself and realigns and resolves the said difficulty at a gradient.

Harnessing just one single particle of true static (the technical process of this is accomplished with Infinity Procedure) and using it to address a case can bring about life-changing results in a pc or Pre-OT. It also appears to alter the very fabric of the universe itself. This one single particle has no mass or wavelength and has an infinite energy potential. This true static acts as a carrier wave that instantaneously addresses any difficulty for oneself or others.

It melts through cases and aberration like a hot knife through butter. Poof! It is gone so quickly that it takes some individuals quite some time to realize that it is gone.

The application of true static in auditing allows for the address of many of a being's difficulties — at the most basic level of the universe itself, and is the most potent procedure and undercut developed to date.

This research is the final echelon, unification, and viewpoint of the entire subject of Dianetics and Scientology – panoramic and complete.

At least for my sake let us hope so!

INFINITY SERIES 3

INFINITY PROCEDURE PC (PRE-CLEAR)

Infinity procedure is more powerful than anything developed before it and is an incorporation of all the technology of dianetics and scientology to date. It is a unique body of technology that bridges the gap between the incomplete level of OT 8 and OT 9. Not only is it technically OT 9, but works fantastically in its PC form on lower levels. It can also bring about the state of true static and handle all levels of case - from clear through the entire upper bridge of scientology.

In skilled hands, there is a lot that this procedure can resolve if a pc has been appropriately set up for it.

1.) What about yourself or the Universe would you like to handle?

Check for reads while also using the suppress and invalidate buttons. If still no read, then ask the question again and get a new item.

2.) Get the concept of a Static/get the concept of a No-Static

This step is run alternately until the pc can do so easily.

3.) Put out the postulate of (Item obtained from step #1) for others.

4.) Put out the postulate of (Item obtained from step #1) for yourself.

Numbers three and four are run alternately until standard EP. Once an EP occurs, then check the original item for reads using also suppress and invalidate. If it reads, then continue through the procedure again until the original item no longer reads.

Do this until the earliest incident in either this Universe or another is contacted. At which time a great sense of relief and serenity will come over the pc. With the cognition that the incident just being run is the first to occur in this Universe or another. That is your full EP for the item.

INFINITY PROCEDURE OT (OPERATIVE THETAN)

Infinity procedure is more powerful than anything developed before it and is an incorporation of all the technology of dianetics and scientology to date. It is a unique body of technology that bridges the gap between the incomplete level of OT 8 and OT 9. Not only is it technically OT 9, but works fantastically in its PC form on lower levels. It can also bring about the state of true static and handle all levels of case — from clear through the entire upper bridge of scientology.

In skilled hands, there is a lot that this procedure can resolve if a Pre-OT has been appropriately set up for it.

1.) What about yourself or the Universe would you like to handle?

Check for reads while also using the suppress and invalidate buttons. If still no read, then ask the question again and get a new item.

2.) Is there a BT, CL, or Entity connected to (Item obtained from step #1).

If no read using suppress and invalidate buttons, continue with the rest of the procedure from step #13.

3.) Where is it located in relation to yourself?

Just get the general direction and distance to be able to focus attention upon the BT, CL, or Entity.

4.) Ask, “What are you?”

5.) Acknowledge.

6.) Ask, “Who are you?”

7.) Acknowledge.

8.) Ask, “What have you been doing?”

9.) Acknowledge.

10.) Ask, “What would you like to do?”

11.) Acknowledge.

At this point, an F/N should have occurred. Occasionally it is necessary to indicate that the BT, CL, or Entity is free to do or achieve the item gotten in step #10 above.

12.) Now ask, “Can you temporarily lend me some of your free theta?”

13.) Put out the postulate of (Item obtained from step #1) for others.

14.) Put out the postulate of (Item obtained from step #1) for yourself.

Numbers thirteen and fourteen are run alternately until standard EP. Once an EP occurs, then check the original item for reads using also suppress and invalidate. If it reads, then continue through the procedure again until the original item no longer reads.

Do this until the earliest incident in either this Universe or another is contacted. At which time a great sense of relief and serenity will come over the pc. With the cognition that the incident just being run is the first to occur in this Universe or another. That is your full EP for the item.

INFINITY SERIES 5

INFINITY PROCEDURE TS (TRUE STATIC)

This procedure is more powerful than anything developed to date. Within it is the unification of the entire subject of scientology to date and is potentially one of the last procedures that will ever be needed. It is not only OT 9 but works fantastically in its raw form. It can also bring about the state of true static and handle all levels of case - from clear through the entire upper bridge of scientology.

In skilled hands, there is a lot that this procedure cannot resolve if a Pre-OT has appropriately been set up for it.

1.) What about yourself or the Universe would you like to handle?

This question should not read or be run even with the use of the suppress and invalidate buttons – if a read occurs handle per Infinity Procedure OT and then pick up the same or another item with this version of the procedure.

2.) Is there a BT, CL, or Entity connected to (Item obtained from step #.1)

If no read using suppress and invalidate buttons - continue with the rest of the procedure from step #13.

3.) Where is it located in relation to yourself?

Just get the general direction and distance to be able to focus attention upon the BT, CL, or Entity.

4.) Ask, “What are you?”

5.) Acknowledge.

6.) Ask, “Who are you?”

7.) Acknowledge.

8.) Ask, “What have you been doing?”

9.) Acknowledge.

10.) Ask, “What would you like to do?”

11.) Acknowledge.

At this point, an F/N should have occurred. Occasionally it is necessary to indicate that the BT, CL, or Entity is free to do or achieve the item gotten in step #10 above. Simply indicate it.

12.) Now ask, “Can you temporarily lend me some of your free theta?”

13.) Put out the postulate of (Item obtained from step #1) for others.

14.) Put out the postulate of (Item obtained from step #1) for yourself.

Numbers 13 and 14 are run alternately to F/N, V.G.I'S, and the cognition that this is not only the first time the item being run occurred; but additionally, the Pre-OT will with certainty know how that has impacted them along the whole track and in this life.

INFINITY SERIES 6

HOW TO RUN INFINITY PROCEDURE

Some explanation of infinity procedure is needed as it has been my experience that many have difficulty with just doing it! Being that it is based upon my newest series of research, it is understandable that there may be a bit of confusion on all of this. After all, I have been absent for approximately the last thirty years.

This form of processing may also appear to be counterintuitive to standard scientology processing, but in practice is not and actually aligns and streamlines the entire subject quite nicely.

The first step of this procedure is to merely question and allow the pc or Pre-OT to communicate what they are having difficulty with in present time. It can be a lack of money or something along the lines of always getting angry, but the important part is, that whatever they are communicating and manifesting in present time — needs to be handled or has never been handled at all. If it had been, they would not be having trouble with it in the first place.

With the recent discoveries that have been made on the level of atomic physics, it can be safely stated that what is manifesting itself in present time is the *exact* thing that needs to be handled in auditing. The underlying cause of all of this being a collection of a composite case, or that of others in the physical universe.

It is probably the *only* cause of aberration after all, as a static being has no case — composite or otherwise!

The next step is to take up any reading BT, CL, or Entity. (Which is done for two distinct and separate purposes.) The first is to discharge a small amount of composite case, while the second is to orientate these beings so that they are willing to temporarily lend a minute amount of free theta (true static). The pc or Pre-OT can then utilize this free theta as a carrier wave to as-is everything within its path. Which is done in conjunction with the utilization of postulates.

What should be noted is that the standard NOT'S commands of “What are you?” and “Who are you?” With the additional commands of “What have you been doing?” and “What would you like to do?” Are only necessary to *handle* and *orientate* these beings.

BT's do not just blow and as-is it would seem; we still have a tentative connection to these beings no matter what we do. Though once handled, they are delighted with the whole affair and do not mind giving us a hand you see.

When this has been accomplished there will usually be a floating needle and very good indicators. There is no point in taking things any further than this as we would end up just Q&Aing. Though on occasion, it is necessary to indicate that it is alright to go ahead and do what they would like to.

Now, once this tiny amount of free theta has been lent, it is a type of energy and particle that has an infinite potential — with no considerations of time or space. The difference between this theta energy and ours is that it closely approximates the true static energy that composes all of creation. This energy

is the workhorse of this procedure and is what brings about such stellar results.

Then the most workable form of wording that indicates, regarding the item from step number one, is used as a postulate for others and oneself. All that is needed is an approximation of the difficulty to be handled. It then goes out into the physical universe and resonates at the approximate frequency to eliminate any mental mass etc.

By putting this up for others, it goes out into to universe as an outflow. Then when putting it out for oneself, it allows for an inflow. Causing a “circuit” of sorts between the universe and us then back again.

It should be mentioned here that the actual inflow usually follows the Butterfly Effect phenomenon, and can take up to 72 hours to for the postulates to manifest in the physical universe. Though in session, these postulates (flows) are run alternately until an EP or Universal Basic occurs.

YOU DO ABSOLUTELY NOTHING ELSE BUT RUN THE POSTULATES (FLOWS) UNTIL A MINOR OR UNIVERSAL BASIC EP OCCURS!

I cannot emphasize or state this enough to get the point across. Do not run or look at pictures. Do not communicate or try to run any BT's, CL's, or Entities while doing this step. Do not be concerned with other postulates or counter intentions. It only occurs because these things are coming into view and then blowing off.

Now, this procedure has a lot of application and needs to be approached at a specific Gradient. If you are auditing a pc, then use Infinity Procedure PC. If someone is between clear and true static, then use Infinity Procedure OT. Once they have achieved the state of TS an intensive of Infinity Procedure TS should be delivered to determine if the OT can handle the raw procedure. At which point they may be hatted and allowed to audit the procedure solo.

That is all, good luck.

INFINITY SERIES 7

GENERALITIES AND NOT ACTUALITIES

We are looking for *generalities* and not *actualities* when it comes to infinity procedure and attempting to handle what the pc or Pre-OT is experiencing and dramatizing in present time. It is done by first taking the item they offer up and then getting them to approximately word the item to discharge any counter-intentions or counter-postulates related to it. It applies to themselves as well as others.

So here is a practical example. Let us say an individual is having trouble with money. Now optimally, we want the person that we are auditing to be able to walk away from session no longer having trouble with money. That is the goal. Though this is usually not accomplished if you say for instance, “make eleven dollars per hour at my job.” That is a bit too literal. Not that this cannot happen as a result of the processing, but if you reduce things down to an absolute you are violating the self-determinism of the individual that you are auditing and that of others within the universe.

So you ask, “How does one go about accomplishing this then?” It is quite simple; you use a generality of the subject addressed. So in the case of that money situation, you can simply run “no more problems with money” until a full EP.

It is done in this general fashion so that the opportunity exists for the person's postulates to go out into the universe and take effect while at the same time shifting events for themselves and others. It is quite magical. The next thing you know, they originate that they are no longer having trouble with money and it turns out they had a rich uncle that has passed away and everything was left in their name.

So you see, by causatively applying this postulate of no more problems with money in the physical universe and utilizing the TS wavelength, a causative shift occurs that not only handles one's case but alters the very nature of one's theta energy.

In most situations, if an item is run thoroughly, it will also manifest in some form within seventy-two hours or less. Which is opposite of the old rule of finding out what happened seventy-two hours previously to cause a key-in in the first place.

That is why we look for generalities and *not* actualities.

BT'S DON'T BLOW

There seems to be a common misunderstanding about the nature of BT's and clusters. Actually, in regards to beings, in general, there is a lot of confusion and misidentification these days. What sector this misunderstanding is coming from and initially started. I do not know. I have never stated definitively in any of my works that they *do in fact blow* – but what do you expect when you're dealing with misidentification in the first place?

Now, what is meant by saying blow within the vocabulary of scientology is that something has as-ised. Most commonly this applies to a mental mass that discharges and is no longer there; which, is followed by an associated feeling of relief.

A spiritual being is emphatically *not* just an energy mass. Therefore, they are independent beings just as we are — except we are in command of bodies. So, these guys do not just as-is and somehow disappear, they are still in existence somewhere in the universe and often have a tangible connection to us that remains. Often they will stay right where they are and continue to do

what they are doing now. Once these beings have been appropriately orientated, they are no longer abberative and cease to cause an effect upon us.

Treat them with some dignity and respect. Having freed these beings, we have a beautiful opportunity to make some new friends and allies in this universe.

INFINITY SERIES 9

COGNITIONS OF A DIFFERENT SORT

Cognitions have always been one of the essential factors in processing, but they have always varied case-to-case and based upon what is being run at the time. There is a possibility that a being's overall theta endowment may play a role in determining their quality as well.

Now, while the revelation of spending an entire life forgetting to put dirty socks in the clothes hamper can be considered to be a valid self-discovery — it is not a very far-reaching or particularly relevant one.

There are these types of cognitions, and then there are those that are directly related to the process and subject that one is running. Which are the most important and relevant of the two types of cognitions by far. For instance, “Oh! That’s the reason I have been terrible with communication all my life!” while being run on Grade 0.

With the discovery of infinity procedure, this is no longer a liability. Whatever difficult a pc or Pre-OT is having while being run on this procedure, usually causes a cognition on the exact reason why that particular difficulty is persisting, or why it occurs in the first place.

That is what we are aiming for in this type of processing. A stable cognition that relates directly to the cause of why something is persisting and occurring in present time.

Almost point-for-point with this procedure a person that we are auditing cognites with each command. So, if we are searching for and aiming towards the larger picture of why difficulty is occurring in the first place — and the procedure is stopped at the first cognition — good progress will not be made.

Oddly enough, this even applies to cognitions that have been viewed at some point in auditing, but never fully resolved. It is believed to be a result of not pulling these postulates in the first place and not having gone basic enough — that is to Universal Basic (the first time it occurred in this universe or another).

When applying this procedure keep one eye open to ensure that the person you are running is cogniting correctly. It produces the best results.

INFINITY SERIES 10

THE BUTTERFLY EFFECT

DEFINITION: (concerning chaos theory) the phenomenon whereby a minute localized change in a complex system can have significant effects elsewhere.

It is important to note that there is a secondary phenomenon to running any form of the infinity procedure. This phenomenon is that an item taken up in session and adequately handled can be seen to manifest itself within the physical universe no later than 72 hours later.

The effects can be lesser or greater depending upon individual circumstances. It can happen that for no sudden or immediate reason a new job offer comes about, or there is new and great news about a friend or family member that parallels an item that has previously been run in a session. It can manifest for the individual or others, but the essential factor is that they immediately see the direct result and connection to what has been previously run.

What brings about these manifestations is that in changing the quality of theta itself and removing all charge an aberration from a subject, a shift is caused within the very fabric of the physical universe that causes a shift in space and time itself. For every thought, effort, movement, postulate, or decision, which we make in one unit of present time can alter and shift an infinite number of

parallel and future time streams. So taking a left turn is a whole different series of events that if we would have taken a right turn.

All of this has been happening and will continue to within the physical universe in which we exist. Infinity procedure is the causative way in which a person can seize control of this mechanism, and not only be free from its trap, but utilize it for the betterment of one's fellow man.

Know this mechanism very well and how to spot it!

INFINITY SERIES 11

UNIVERSAL BASIC

In light of the recent discoveries that mental and physical universe mest is composed of True Source (the collection of all static energy in its pure and natural state). The cause of all of remaining human ills and aberration has finally been uncovered.

Being that theta and en-theta are only manifestations of this same TS — based upon the intentions of, and motivations of, the thetan that is utilizing that energy over time. It can be safely stated that there exists true static as well as true en-static. We would then have the TS from which TS and TES stem, or originate from. Followed by the various degrees of theta and en- theta. Including mental and physical universe mest composed within them.

This whole beautifully abberative dichotomy: is the universal law which this universe is built upon and persists.

The basic of all things would be them existing in TS or TES form. This same principle applies to all of life and scientology — including auditing. It appears to be the main reason why some cases could never be cracked or resolved. Because whether it is a postulate, facsimiles, engrams, flows, ridges, or efforts; they all have a Universal Basic (the first time something occurs in this universe or another) that is composed of TS.

Now the trick to all this is that if something has been as-ised (reduced to TS), there's no way to detect it except by surrounding circumstances and phenomenon.

Luckily this has now been solved and can be accomplished with IP. It is done by handling case factors without actually handling those factors. Seems like an oxymoron I know, but it is true.

You take a person and run them on IP and allow them to make changes and handle things for others causatively — you will quickly see that the very quality of their theta begins to change. With lifelong habits, aberrations, and problems as-ising by the truck-full.

There is whole other side of all incidents that are recorded and imprinted on the actual static of a being itself. Since this is static energy that cannot be physically measured at this time — even with an E-meter — this form of auditing must be done via considerations and manifested results.

The actual mental mass *surrounding* these items will read because they are of a denser form of energy, but the static items or portion of incidents will not. These static portions are probably the reason why mental mass exists and remains in the first place. Though they can only be viewed, analyzed, and changed in PT based upon the individual viewpoint and considerations of the being viewing them.

As a practical example, say an individual is in a car crash fifteen years ago and was severely injured. They then go through all of the physical rehabilitation necessary and became addicted to opiates in the process. Which later causes them to become a drug addict.

This car accident essentially makes an entire mess of this person's life in the years to follow.

Now, ten years later they come across the subject of scientology and begin to receive auditing to help sort out their life. They go through a purification program to handle all of the restimulative effects of drugs and toxic

substances. Then a drug rundown is delivered to them to resolve this issue with drugs. At this point, they are run on dianetics to handle the engram that has been formed from this accident, and it goes well.

Things continue in this fashion, and thirty years after this car crash the person has now gone entirely up both sides of the bridge. They are in an incredible condition beyond anything that they could have hoped for; but there is one problem, in that they still find themselves to be quite anxious at times. There is no explicable reason why, as they have achieved the state of OT 8 and things should have resolved by this point.

Why haven't they? Well, because the car crash still *happened* and remains on a static level. What is meant by a static level? You take this person and ask them about the car crash, and they will say, "sure, thirty years ago I was in a crash that screwed up my life" and "thankfully scientology was able to help me."

Even though this event has been addressed in many different forms of processing, it is still there. It can be viewed, and it can be experienced again, to some degree or another.

If you ask, "what should've happened regarding that crash?" They may say, "I should've never have driven that day" and a funny thing will happen. You can ask them about the crash in another year, and they will say, "what crash? Oh, that's right! I haven't thought about that in a year or more!"

This is because they never got into the car to drive that day, and have now changed their considerations regarding the situation. It has ceased to exist for them because they are no longer creating it in present time.

Long story short. To reach a universal basic, you need to go e/s and not only contact each postulate made in the process — change the considerations as well.

That's all.

INFINITY SERIES 12

SYNCHRONICITIES OF TIME

It's quite funny that the word synchronicity has two opposite definitions these days — though this is always the case with a thing or subject that one does not understand.

The original Greek definition of synchronicity: sunkhronos from sun- 'together' + khronos 'time' simply meant "existing or occurring at the same time." Was conveniently changed later in 1950, by none other than Carl Jung to mean "the simultaneous occurrence of events that appear significantly related, but have no discernible causal connection."

When it is quite evident that anything that is commonly known as a coincidence has a similar circumstance or event related to it.

What a crock! Even the most uneducated and casual observer can see the correlation between events that can happen thousands of miles apart and at the same moment in time. For example, this can be witnessed with the many forms of faith healing in which a group of people will pray for a sick or injured member of a congregation, and miraculously they will recover. Further, this takes place at the *exact* same time they were praying for the individual.

Many different terms have been coined for the phenomena of synchronicity of time. Probably the most popular is karma. However, there is nothing that happens in our universe that is not a direct result of cause and effect. The only difference is whether or not we can see the effects, which are a result of these causes, through large units of time, space, or intervening events.

As a practical example, say you are driving around and decide to give a homeless man some money and then go about your day. This money then enables the homeless man to travel to another city and get a job. Five years later, you move to the same city and run into this man who is no longer homeless, and he invites you over for dinner to thank you. You go to dinner and meet his pretty sister where the two of you later become married.

Now, most would say this is just karma coming back around because it was not possible to see the periods of time — between where the homeless man was given the money — and the meeting of the pretty sister. If this had been recorded, we could have seen that this is a direct result of giving the man money, which led to the meeting of the sister and marriage.

What does this have to do with processing? Well, it has to do with an entirely new phenomenon that has come to light in the research and codification of the technology that composes the infinity series.

It is to *causatively* alter time and space for the betterment of all of the dynamics. The same way that mental and physical universe mest are interconnected, so it would appear that time and space are also interconnected as a composite part of theta-mest. Per the axioms of scientology, both are only postulates.

This phenomenon sheds further light on the fact that an individual retains every single moment of time that has taken place in the past, present, or future. They also retain in present time every single moment of time for everyone else as well. After all, a being has an infinite capacity for space and time, and if we all did not co-create each moment of time and space, then it would not exist.

These individual moments in present time are an entirely separate series of parallel universes and events.

Say 200 years ago there is a traveling merchant — which was quite common at the time — that would go from place-to-place selling his goods. This merchant then comes to a fork in the road which can either go left, straight, or right. He decides to turn right as this is known to be the shortest path to his destination. In doing so, he travels for a short amount of time and then is robbed by some other men for all of his goods, and is only left with his horse. He then rides into the nearest town where he enters a tavern to have a drink of wine and to complain about life's woes.

Okay, I'm not attempting to write a western novel here, but instead, point out the ramifications of time and space and how they can be altered as well.

If this same merchant had preceded straight ahead instead of taking a shortcut, he would've experienced a different series of events than being robbed for everything he owned. He would've arrived at the nearest town and sold all of his goods for twice the regular price, and later become rich.

When put into this perspective, it is easy to see that these two choices lead to an entirely different series of events. On a larger scale plotted against time, not only are these an entirely separate series events — but universes. This principle also applies to the minutest of things such as every thought, action, movement, postulate, or effort that we make in PT.

In running any version of infinity procedure, we are using true static energy to approach and approximate the universal basic incident on any subject or difficulty. Once it is contacted with the proper time, place, form, and event, then the whole chain or series of events is entirely as-ised. Having done so, this creates a sort of vacuum or space that is then converted to true static energy and returned to the thetan.

It takes place in the theta universe of the being itself, but also instantly and simultaneously occurs in the physical universe. In creating this vacuum and as-ising an entire chain of events in the physical universe, in a causative

manner — a thetan can control and manifest things in the physical universe itself.

There is an observable group aspect to all of this. If you have six people running infinity procedure in the same group or region, they all then begin to pick up and audit the same items towards the same goals. This is a wonderful thing as it creates full-scale cooperation among scientologists — with the addition of not having to sacrifice the first dynamic completely. Which means a person can still improve their first dynamic while simultaneously helping the group and others.

A lot of weird things can turn on and happen while all this is going on, but do not become discouraged as it means you are probably doing things right!

It is only the last dying gasp of the physical universe and its laws attempting to prevent us from the ultimate freedom of obtaining true static. Don't let it.

INFINITY SERIES 13

TRUE STATIC

DEFINITION: **1.** the state in which a Thetan no longer has a mind, a whole track, mockups, or remaining aberrations. He operates causatively in present time on a complete beingness, doingness, and knowingness basis with complete ethical and causative control over matter, energy, space, time, form, and event. **2.** OT 9 on both the training and auditing sides of the scientology bridge. **3.** synonymous with the original definition of a static - a being that has the full quality and character of static with infinite potential. **4.** theta (or thought energy) that closely approximates that of true source while retaining its quality and character; to operate, without reverting back to the source.

The work I believe is nearly completed, and we can now obtain quickly all that was an envisioned initially with the state of OT and more.

While there have been astronomical gains and wins with the subject and practice of scientology — a quick observation of the subject as a whole, and the players of the game involved, will show just how short we have all fallen off this mark.

This is by no means criticism or invalidation of any of you, and I would like to sincerely thank you all. For without your help in continuing my legacy there would have been no scientology for me to have returned to this life.

I have spent the last thirty years living on this earth watching, waiting, and gathering my strength so that I can finish the work that I started so many decades ago. The last two years of which I have spent in the research of finally and fully bringing the subject of dianetics and scientology to a relative close. Further, reducing it down to one single procedure that embodies the entire technology as a whole.

Infinity procedure and its three variations is a long way towards this ultimate goal, and I feel that it will not be too much longer before this goal is realized.

It can handle all levels of case and also repair or crack extremely difficult cases. Composed within this technology are the last few remaining mysteries of the entire universe in which we exist. Namely, the universal law and mechanism upon which this universe is built and continues to exist in present time and into the future.

The result of this procedure is to bring somebody up through clear to OT and the final state of true static. At which time, we have a free and causative being that can accomplish anything within this universe for themselves and others. How far-reaching this is I cannot even speculate at this moment in time — as more data and phenomenon has resulted in the application of this procedure than possibly the entire standard bridge itself.

So use it well, and you will experience and see things you have never believed possible.

In closing, I would like to say one more thing to you all. Having begun to complete this work; I honestly do not know what is next for myself — I have done this for far too long — but would like to ask a few things of you now.

Whether or not I am or remain, L. Ron Hubbard is not for me to decide and you owe me nothing at all. In fact, I have always felt it was my duty and

obligation to do this, and it has always had little to do with myself despite whatever may have been said.

Last life I knew that my days were numbered and I ended up paying the ultimate price to create this lasting legacy. All I ask is that if you full heartedly believe in the philosophy that you continue that legacy.

For no person, group, entity or god, has the right to enforce that upon you or say that it is so. If it works for you, then it still works for you.

I had once stated and feared at the time that the war to end all wars would, in fact, be atomic in nature. We are at a pivotal time in humanity's history where the battle can still be won or lost, but this battle will not come via conventional means. It will be a war between ideals and what we believe in, and for the world to survive, that belief system must be scientology. It is the only workable system that we have.

While the world may look very bleak, do not become discouraged and never forget that in this game, you are no longer men and women but gods among men - and no one can slay a God.

WELCOME TO INFINITY.

HCO BULLETIN OF APRIL 15 2018R

general distribution
to all auditors
to all C/S's

This is a pilot method for running and reading an item on Infinity Procedure and potentially in other auditing. Not yet widely tested.

Beyond the Floating Needle

The Means by Which Any Item May Be Completely As-ised and Fully Resolved

In order to accomplish the uniform obtainment of Universal Basics in auditing, a few principles need to be readily understood for this to happen.

First, when running anything “for others” and then “for yourself,” things become unbalanced as a result of postulating one side in favor of the other. To obtain the most optimal balance, it is necessary to postulate in a 1-to-3 ratio of one time “for others” and then three “for yourself.” The results are nothing short of miraculous when done in this fashion.

What will start to happen is the needle may be seen to slightly rise on the “for others” command while it will generally produce a fall or small fall on the “for yourself” command. This will continue for some time and then the TA action will eventually go flat — it is important to not stop at this point but to continue on. It can sometimes appear that things are becoming a bit massy then they will begin to slowly dissolve and eventually this will produce a large blow of mass along with a BD on the meter. This may at times take as much as 3 to 8 minutes to accomplish but is well worth it. Then this process is repeated.

If this is continued long enough it can be observed that the needle is closely starting to approach 3.0 and the male clear read (it may do this for women and approach the female clear read also, but that has yet to be verified.) The goal is to bring the needle to the clear read by postulating on a 1-to-3 basis “for others” and “for yourself” until it does. When it occurs you will know the difference; because so much charge will blow off, that you will be absolutely certain what you have just run is completely handled for good. You will also be able to feel a tangible difference in the space around you — and if you pay close attention will also come to realize that those things are gone from your space permanently.

A few things worth mentioning as well, is that when doing this it is necessary to Assimilate each time that a postulate is put out “for others” and “for yourself” or the desired results will not be obtained. We are not mocking things up here, but instead are postulating much higher on the Tone Scale at around 39.9 — Aesthetics or possibly true static energy.

This method is applicable to at least all forms of processing from Infinity Procedure and onward. It produces results even I have never seen this life. Give it a shot and see for yourself.

If any issues, then run Assimilation in general until it is remedied thoroughly.

all infinity procedure C/Ses

ADDENDUM TO HCO BULLETIN OF APRIL 15 2018R

BEYOND THE FLOATING NEEDLE

I have just discovered the basic reason why Infinity Procedure works so well and so swiftly — that reason is postulates.

Due to the fact that postulates exist so high on the tone scale when putting them out on a given subject, they then discharge against any postulate similar in nature in any incident, engram, facsimile etc... causing these to blown into view and then as-is on command. Though this was not quite enough to fully handle a given subject or item to full resolution in many individuals — given the final analysis of IP in full application.

Despite the speed and efficiency of IP I began to suspect that there was quite a bit more to this scene that needed to be investigated; and the result of this investigation was extraordinary. Now it is too soon to definitively state but it would appear that the major out-point in Scientology is the fact that we ceased to utilize the full EP of Dianetics processing in Scientology.

This is why Infinity Procedure works so well, it has been as-ising postulates that remain in facsimiles wholesale all along the wholetrack; which also means that the remaining facsimiles have a portion of them higher on the Tone Scale and in wavelength that are still persisting. They do not have the same force that Engrams do but have the ability to effect a Pre-OT as is evident by the fact that high level cases still have fixed conditions and somatics etc...

That is a bit of sound conjecture based upon the data I have at the moment — so now I will provide the means by which this can be tested.

When running IP: get the item to be addressed by asking “What about yourself or the Universe would you like to handle?” Then “Locate a time (item from #1 of IP) was unoptimal?”

Take this incident and run through it from beginning to end — the same way you would with an Engram or lock — and get all charge off of it until the postulate that not only you made, but any other made during this incident comes into view. At this point it will blow and F/N. Call the F/N and then take it E/S repeating this process.

This is continued until Universal Basic, V.G.I’s, male or female clear read on the dial, and the cognition *that with absolute certainty this is the first time this has occurred in this universe or another* is achieved. That is the full EP.

Don’t take my word for this and give it a shot. There is nothing like it.

[PILOT PROCESS]

HAVINGNESS FOR TRUE STATICS

Over the last four months and since the release of the Infinity Procedure something has become apparent that I have long suspected; there is a higher order of Havingness that exists for OT's — including what we now know as a True Static. In delivering IP and with others solo auditing it, a common complaint has been a drop in havingness and going slightly down toned if continued for an extended period of time. It is quite obvious that this was a lack of havingness — but by popular convention and Standard Tech to date, one is not run on any havingness process after clear.

So this phenomenon was worth a second look and I have discovered the following:

HAVINGNESS + DUPLICATION = ASSIMILATION

The pertinent definitions of havingness are as follows:

HAVINGNESS, 1. that which permits the experience of mass and pressure. 2. the result of creation. 3. the ability to duplicate that which one perceives, or create a duplication of what one perceives, or to be willing to create a duplication of it. But it's duplication. 4. ability to communicate with an isness. 5. the ability to conceive an is-ness and communicate with it.

Those for duplication are:

DUPLICATION, 1. cause, distance, effect, with the same thing at effect as is at cause. 2. the flow of creation. Duplication is the process by which a thing persists.

A tentative definition for ASSIMILATION could be stated as:

ASSIMILATION, 1. the process of taking in and fully understanding information or ideas. 2. The process of creating a concept or mock-up and flowing True Static energy at it, in order to cause it to persist and exist. 3. remedy of havingness for OT's and True Statics. 4. the simultaneous duplication and creation of time, place, form, and event in oneself and others or the universe. 5. to imbue a creation with True Static energy. 6. causatively manifesting one's own creation.

For far too long case gain has been very much one sided. By one sided, it is meant that limited and negative case gain processes have composed almost ninety percent of the Scientology Bridge to date. Over sixty years ago I stated that Creative processing was the backbone of Scientology processing; but due to limited application and a lack of uniform application, it was discontinued in favor of more workable case remedies.

Though what exactly happens, when negative case gain processes are run too long and ability and training becomes one-sided? Simply put, you strip an OT and TS of their entire universe as they have ceased to causatively and actively create that universe in PT.

You can see this all of the time. The OT 8 completion that is sitting in corner of the room staring off into space with a starry-eyed glance, and if one did not know otherwise, you would assume that this guy was a haunted soldier that just returned from the most recent war and is reliving its atrocities. Then there is the OT 234 or some such nonsense, which has all of the answers but would be hard put to tell you how to tie his own shoe laces.

Man! They are next to nowhere as an OT; but nonetheless much better off than the average homo-sap.

This has never been more apparent than when releasing Infinity Procedure to the broader public. It was so swift in its results, that instead of this happening in the span of years; often it would occur within several sessions. The power of postulates — with an infinite potential and the ability to strip a case of aberration and charge wholesale — will do the same to an individual's own creation.

This was probably the main reason behind creative processing becoming unviable on upper level cases.

Now that we have remedy of havingness for those cases, it has opened the floodgates to an entirely new echelon of processing. It is senior in importance as it is the entry point that makes all of this possible. As such it needs to be thoroughly understood and it will be the cornerstone of things to come — least among them OT X through OT XIII.

The process is simple as processes go, and this can be turned into an entire Rundown itself for a complete remedy of havingness.

THE ASSIMILATION PROCESSES

- 1.) What would you like to have?
- 2.) Now put out the postulate of (item from #1) for others.
- 3.) Assimilate it.
- 4.) Now put out the postulate of (item from #1) for yourself.
- 5.) Assimilate it.

To assimilate you simply have the OT or TS flow their own True Static energy at the postulate.

- 6.) Repeat steps 1-6 until EP or V.G.I'S and the OT or TS is feeling bright.

- 1.) What would you like to not have?
- 2.) Now put out the postulate of (item from #1) for others.
- 3.) Assimilate it.
- 4.) Now put out the postulate of (item from #1) for yourself.

5.) Assimilate it.

To assimilate you simply have the OT or TS flow their own True Static energy at the postulate.

6.) Repeat steps 1-6 until EP or V.G.I'S and the OT or TS is feeling bright.

It should be noted that there are two separate methods for running this. They both can be run all the way through and then repeated with anything in general; for a complete remedy of havingness and stabilization for an OT or TS. Then “What would you like to have?” or “What would you like to not have?” can be used at any time to remedy havingness when running into trouble in utilizing the IP or any process that follows it.

This can also be used to address a specific item similar to the methods of IP. You simply get what you would like to have or not have, and then Assimilate it for yourself and others alternately until EP. It has been my experience that when doing so these items manifest in approximately 1/4th of the time compared to IP. In all likelihood, this manifestation phenomenon is directly related to a remedy of havingness and was only being partially addressed indirectly.

It would seem that this is going to be an invaluable process. Get it down cold as it will be needed.

[PILOT PROCESS]

ASSIMILATION—EMPATHY—INTERCHANGE^N

THE NATIVE ABILITIES OF A TRUE STATIC BEING.

Do to the recent discovery of Assimilation and the remedy of havingness for TS's and OT's I have also discovered that there is another triangle and three associated abilities that are senior to the BE-DO-Have triangle. They also correspond to the highest levels of the tone scale.

They are ASSIMILATON, EMPATHY, and INTERCHANGE and they are the senior abilities of a STATIC (True Static). This is as high as it goes and potentially exceeds the tone scale itself from Tone 40 to INFINITY. This whole band of the tone scale corresponds to and is composed of ASSIMILATION—EMPATHY—INTERCHANGE.

Assimilation has already been covered in HCOB 03 APRIL 2018 — ASSIMILATION thoroughly, so I will cover the other two here.

EMPATHY, 1. the ability to understand and share the experiences of another, or another thing. 2. simultaneously and instantly experience that of another, or another thing, within oneself via duplication. 3. assimilate the space and experiences of another. 4. to causatively create that of another as a composite part of one's own universe.

Now this can be a bit tricky as it may at first be difficult to spot the differences between BEING another or assuming their viewpoint, and EMPATHIZING. Though it is quite simple if you realize this is all done with knowingness, telepathy, and the communication formula — with the exception of NO distance.

Remove distance and we have the key to all of this. A static does not go anywhere or move or change its position in space except by postulate and what he creates — it just exists. The means by which it is able to experience is through EMPATHY.

This also applies to INTERCHANGE as follows:

INTERCHANGE, 1. when two or more people or things exchange with each other. 2. to put each of (a person or thing) in the other's place. 3. be able to be exchanged with another person or thing. 4. simultaneously and instantly experience that of another or another thing within oneself, from within another person or thing. 5. experiencing one's own EMPATHY from the viewpoint of another.

Now this one is wild to tell the truth and took a good three-hundred hours for me to sort out myself, but thankfully I can now save you all the trouble.

A practical example of this would be anger. You get angry and of course another fellow reacts to this in a certain manner, it can be fear or by getting angry himself — but it is a definitive reaction.

Lower on the tone scale with ARC, we would have an exchange of particles or energy, and distance as a consideration.

When one is a Static or True Static there is no exchange at all; but interchange, and distance does not exist except by postulate only.

As a static you would get angry — then through empathizing — would experience your own anger via the other guy's experience. To put it simply, it would be the process of moving into the viewpoint of the other fellow, and then experiencing yourself from that viewpoint while still experiencing your own beingness from your original viewpoint.

There is a further factor of all this to mention. The same way that ARC is the composite parts of understanding; assimilation, empathy, and interchange are the composite parts of TRANSCENDENCE.

TRANSCENDENCE, 1. existence or experience beyond the normal or physical level. 2. exterior from portions of, or all of matter, energy, space, and time. 3. to remove oneself from something and to remain independent but in causative control of it.

ASSIMILATON, EMPATHY, AND INTERCHANGE PROCESS

- 1.) What would you like to have?
- 2.) Now put out the postulate of (item from #1) for others.
- 3.) Assimilate it.
- 4.) Now put out the postulate of (item from #1) for yourself.
- 5.) Assimilate it.
- 6.) Now put out the postulate of (item from #1) for others.
- 7.) Empathize with it.

This is done by putting out the postulate of the person or thing, and then experiencing what IT is experiencing from your viewpoint and its simultaneously.

- 8.) Now put out the postulate of (item from #1) for yourself.

9.) Empathize with it.

10.) Now put out the postulate of (item from #1) for others.

11.) Interchange with it.

This is done by putting out the postulate of the person or thing, and then experiencing what you are experiencing from the other persons or things viewpoint and experience.

12.) Now put out the postulate of (item from #1) for yourself.

13.) Interchange with it.

14.) Now put out the postulate of (item from #1) for others.

15.) Transcend it.

This is accomplished by putting out the postulate of the person or thing and simply stepping back from, or removing yourself from it with a pan-determined view.

16.) Now put out the postulate of (item from #1) for yourself.

17.) Transcend it.

18.) Repeat from #1 with the same item until EP.

If at any point the TS or OT becomes ill or has difficulty — remedy havingness with the assimilation process — then continue to run the procedure.

pilot process

NEW ERA SCIENTOLOGY

After two lifetimes, over 100,000 hours of research, and as a result of the efforts of myself and many others — I believe that the endgame of scientology has finally come into view. It is with much excitement and joy that I can firmly announce a discovery that may be the very root of all life itself and how it is created in the physical universe. A development of such importance that not too far in the distant future I believe we will all find ourselves on the cusp of an entirely new wave of technological advancements.

With another golden age to soon follow here on Earth.

This discovery does not come without its price. I'm going to need a lot of help, and it is going to be a lot of work on our part to get this tech in on the planet. It may very well redefine the subject of scientology as we know it and how we have all come to view the world and the universe at large. Towards that end, I am offering up this pilot here for all capable individuals and practitioners so that they may apply it.

It is with the highest level of ARC and love that I offered to you now — New Era Scientology.

NEW ERA SCIENTOLOGY COMMANDS

1.) “Can you locate a point of equilibrium regarding_____?”

2.) “What objects are connected to that?”

2a.) “Are there any other objects connected to that?” (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

3.) “What energy is connected to that?”

3a.) “Is there any other energy connected to that?” (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

4.) “What space is connected to that?”

4a.) “Is there any other space connected to that?” (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

5.) “What time is connected to that?”

5a.) “Is there any other time connected to that?” (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

6.) “What experiences are connected to that?”

6a.) “Are there any other experiences connected to that?” (Run repetitively until F/N, V.G.I’S, and COG. The F/N is not called.)

7.) Now spot the exact point of equilibrium in that. (Run repetitively until F/N, V.G.I’S, and COG. The F/N is now called.)

HOW TO PROPERLY RUN NEST

(NEW ERA SCIENTOLOGY FOR THETANS)

By equilibrium, it is meant the exact point at which all total opposing forces are equal. When this occurs, it is also when theta or static itself is formed and takes upon all the same qualities and character of these opposing forces. This appears to be the cause of all mental phenomena continuing to exist long after it has occurred in the physical universe. By uncovering all of these forces and then spotting the exact point of equilibrium when it was formed — an as-isness of an as-is takes place.

Unlike any form of processing that has come before it New Era Scientology can be used to run any engram, secondary, implant, ridge, or entity interdependently of alike phenomena and manifestations in both the bank or composite case. The auditor queries and finds out what the person is in or would like to handle and then runs it through the procedure. It can be done once or twice through for a repair, and then left off with no liability of being underrun or overrun and without keying in the person and leaving things unflat.

If a full resolution is being aimed for, then; the process is simply done in whole repetitively until the person under auditing originates an absolute certainty and an understanding of the fact that a full resolution has occurred.

When inquiring about what an individual needs to have handled or is currently stuck in; the hottest thing that you can have is something that is f/ning. It means the majority of the charge has already been gotten off and is what the individual has the most reality on. This is only done provided that they still have attention on it and are interested in resolving it. Which is the direct result of static charge remaining in the incident etc.

So the degrees of reads here are the f/n, null needle, and then an actual read itself. It may sound a bit odd, but with this form of processing, we are approaching things from the top and not the bottom of the scale. When put into this perspective — it makes perfect sense.

Another critical factor is that with running what matter, energy, space, and time are connected to the said difficulty: it is essential to ensure that all of these are run in turn to an f/n and cog. Enabling an unburdening of the case so that the person is then able to spot the exact point of equilibrium. Which then brings about a complete as-isness and duplication of what is being addressed.

I have given only a brief explanation of how to apply this amazing new technology. The full data on its development and application will soon follow, but for now, this stuff is so hot that it needs to be put immediately into the field to see just how far reaching it is.

That being said let us get it done, shall we? I believe it is high time that we take back what is ours and to change this planet for the better!

Good luck.

Additional points that should be taken into consideration when running New
Era Scientology for Thetans

ADDITIONS TO RUNNING NEST

Over the last two weeks, I have discovered the original recall mechanism for a thetan would appear to be merely spotting something.

On some level, a thetan knows all things even if he cannot view them in a degraded state. The thetan only has to observe what it chooses to by locating it within time and space. It is that simple.

The only issue with this is many static points, or points of equilibrium have been formed over time due to impacts, etc. Which appear to be the root cause of all engrams, facsimiles, and other mental energy manifestations.

So at the point where an impact occurs and equilibrium of forces is achieved; the above mentioned mental masses are created with both mental and static charge as a part of their composition.

Whenever our attention is on one of these masses — or something in the environment approximates them — they are recreated. Becoming denser over time and pulling in a greater and greater amount of energy. It is an interaction of *static* energies in incidents and postulates. Not an interaction of *theta*(thought) energies as there is a marked difference between the two.

Probably the reason an engram or mass comes to be in chronic restimulation in the first place.

On all cases that were run on the NEST procedure, no matter the level, in asking them to spot a point of equilibrium they have invariably never failed to detect something. Not once.

Something always blows into view. There may be no read, and there may be no visio, but there is still a concept, a feeling, or an idea.

It has nothing to do with the mind. The thetan goes right to it — and does so by spotting.

So a thetan will go directly to the point of equilibrium asked for, and it *never* reads. The only time a read does occur is when they are near some aspect of an equilibrium (static). At which time a read can be observed on a meter.

A static has no energy or mass but does have an infinite *potential* of energy and mass. The static that is in an incident can then discharge against us. Producing a fall when attempting to view the *exact* point of equilibrium at its inception.

The higher potential static is what appears to be causing the electrical discharge phenomena in the mind. All other mental and physical universe masses are lesser in energy potential, so they are discharged against by this static energy.

Until now in auditing, we have only been getting the mental masses and charge off of a case. As soon as attention is put back onto any of these static points, it is recreated and mocked up again.

The odd point is that most cases which have gone clear mostly have *static* pictures. They do not move.

In any event, I will tell you how to get rid of the damn things instead of going into the comprehensive theory behind all of this. That will all come later at some point I am sure.

When running the NEST procedure give the commands and take whatever the PC's attention goes to. Have them continually spot the point of equilibrium in what they are viewing, even if it does not read. It may need to be spotted upwards of 15-20 times, but the needle will eventually begin to open up and read. It will then finally BD or culminate in multiple LFBD's on average of .2 to .5 DIV's of TA on average. Or more.

Keep them locating and spotting points of equilibrium, and you will see more case gain than ever believed possible.

That is all.

SUB – O PROCESSING

Subjective-Objective Processing and its Usage in Resolving Composite Case

This form of processing at a minimum is three times as efficient and effective as standard subjective processing run from the first person viewpoint. In the testing and application of this technique, it has never failed to produce at least three times the amount of charge released from a case — where that charge is available — and also has resolved long-standing case factors that appeared to have no previous resolution.

For a long time now we have had a term in Scientology referred to as the “composite case.” A term referring to phenomenon that was never fully understood, and was part of a research line that remained uncompleted last lifetime.

So, I have been looking into this subject heavily for the last two years as one of many potential out-points in the upper levels of the Bridge. The composite case as it referred to, is essentially case factors or aberrations that are not our own, and stem from something or someone other than ourselves.

These aberrations or case factors must then be “composed” of yourself, and whatever this other thing may be.

Up until now, it was believed that the cause of this was other beings that are stuck to us or are in the space surrounding us. Referred to as BT’s (Body

Thetans) or CL's (Clusters – a collection of Body Thetans in a group with a mutual incident).

That is a simplified explanation of what a composite case is and is mentioned here for those who may not be aware of the data.

WHAT IS THE COMPOSITE CASE — REALLY

Given many recent discoveries and current research I had to revisit this phenomenon altogether because I suspected that in some part the concept of the composite case contained out-points. I believe that for the most part, I have worked out what the majority of these points are — though it is too soon to say for sure. There is still a lot that needs to be studied and applied before it is drawn up into a definitive version of technology.

At the moment, it is entirely workable and produces some incredible case gains and results.

I will explain how the composite case functions and then I will tell you how to audit it out.

At any point in time where two beings or MEST (or multiple beings and MEST) have a mutual impact in common, composed of enough force to produce any pain, unconsciousness, or discomfort: there is a point — only if this point is a fraction of a second — where all opposing forces will equal zero and obtain a total equilibrium.

Simultaneously creating a *static* force that has a complete absence of matter, energy, space, and time; but has the *infinite* capacity and potential of matter, energy, space, and time.

Therefore, following the Law of Conservation of Energy: the discharge of any force containing MEST will thereafter perpetually exist, in potential, as a static that parallels all of the initial forces at the moment of initial discharge.

The above is a short description of the UNIFICATION PRINCIPLE. It is the fundamental basis that underlies the entire universe and life itself. It is how life is formed and continues to exist, moment-to-moment.

I believe that this is the only absolute that exists within in life and the universe. As such, it forms not only the underlying basis of life and Scientology itself but will be the stable datum from which further technology is developed and is aligned.

Having said all of this. When one of these interactions takes place between beings or MEST, and an incident or energy manifestation of any type is created, it becomes recorded in each beings reactive mind, space, and in the physical universe itself.

That is the best description of what a composite case or incident is.

Let me put this in practical terms. Say a husband and wife do not have the most optimal marriage. They frequently argue, and the husband is also prone to beat on his wife regularly. Over time this will cause them to have many abberative or engramic experiences between one another.

At some point they both decide to call the marriage quits and to get a divorce. Now, years later, the husband comes across the subject of Scientology and begins to get some auditing. He even goes so far as to become clear, but still has many different case factors that continue to persist regardless of them having been run and picked up from every available auditing approach.

In particular, this man now finds himself to be quite fearful of others. When several years prior, he was quite aggressive and virile as a man. Those days are now gone for him, and with an analysis of his case, it would appear that there is no other explanation for this.

Usually, this would lead to an auditor or C/S assuming that something was missed or not run on the case altogether and it has to be the “composite case.”

Now if you take this guy into session and ask him to locate another (separate) being that is causing him to experience fear — an amazing thing happens. His attention will go directly to his ex-wife, and he will get a concept of what she is doing and where she is located at in present time. Further auditing of why she is causing this will reveal that it is the result of him beating her during their marriage.

The odd thing is this will not be his fear, but *her* fear at the moments when he was beating her. It is all her case. The counter-thought, counter-emotion, and counter-effort belong to the wife — which is now occasionally affecting the husband in PT.

If the husband is instructed to telepathically take the wife through this incident using upper-indoc TR's: of control via communication (telepathy) — it can be seen that *his* fear has now disappeared in present time.

It would appear that this is the result of the mutual incidents that we have had along the wholetrack, with all of the different case aspects they contain— becoming restimulated — chronic or otherwise.

They then key-in against the other person(s) that were involved in them irrespective of time or space.

It was erroneously thought that auditing one end of these things would fully resolve them, and for some time, I believed the same thing. I can now definitively say that this is not the case. In the application of this procedure, I applied both methods and got mixed results or no resolution of case factors being run. Both sides have to be addressed to get the fullest benefit from auditing.

Yes, this is distinctly different than running various flows while delivering a process. When we audit another flow, we are only ever getting our objective view of what someone was thinking, feeling, or doing at some time in the past.

How could we ever know that for certain? The truth is that you can't without getting them into session, or communicating with them to determine what they were experiencing "back then".

To some degree, this continues to affect us until it is handled in some fashion. Given that most of the people we have wronged are now dead and located elsewhere, it is a good thing I have discovered a way to address this. If not, we all would have been in serious trouble with no help on the horizon.

So, we take something that is subjectively bothering us and has been handled, previously or not, and then objectively handle it in another being with a mutual incident in common with us.

The mutual incident of the greatest magnitude will be found to be the one that has a counter-postulate or counter-intention that is causing the difficulty of a pc to exist or persist in present time.

Granted this is if the subject has already been addressed by other means, but this form of processing can easily be used to replace standard flows and is productive of much more case gain as a result.

SUB-O PROCESSING COMMANDS

1.) "Can you locate a point of equilibrium of another being that is causing _____?"

or if this is too steep a gradient

"Can you locate another being that is causing _____?"

You keep spotting points of equilibrium until an ep with the certainty that the other being has been fully handled — when using the first version. If using the second version, any portion of the grades tech can be used to achieve the same ep and certainty.

It depends on the gradient, and an auditor will have to use their judgment in determining which approach to use. I have personally found that both work equally well. The former is the simpler of the two to run.

Alright. There you have it. The discovery of one of the most significant answers in the entire universe and the potential resolution of the composite case.

Use this tech and come to understand it well.

Now, I know that I have said many times in the past that “this is it” or that I had finally discovered the “IT” — the great thing that we have all been searching for time immemorial.

In my defense, where I was caught up in my zeal, there was indeed many times I thought that I had.

I guess that it was my naivety and a gross underestimation of the ability that we all inherently possess, that was very deceitful and misleading when it came to the upper levels of scientology.

The tech just kept on coming, and more and more questions were produced that only led to even more discoveries and questions. In the process, I am sure that many beings became disillusioned and gave up on the subject entirely.

To avoid the same trappings this life I sat on these discoveries for almost four months before releasing them. I checked and double-checked all of the data, and for the first time, I no longer have any questions regarding the mind, the spirit, and life.

The work is done, and it is complete.

We have all crossed the precipice of the Bridge and eternity itself.

The final shot has been fired, and I now know the face of the enemy that has plagued humanity since the beginning of time. From the very inception of the universe itself.

You too will soon know these things as well. For this time around I will produce my seminal work, and it my gift to you all.

So join me on this final leg of the journey and let us free everyone once and for all.

Once this is accomplished, I will share something with you that many have long suspected — that Scientology was only a precursor to something much greater.

That ladies and gentleman is the subject of TECHNOMANCY.

The truth of things to come.

I would like to give special thanks to two wonderful beings and stellar scientologists.

The first is Perry Sheppard. The oldest living practitioner of scientology from the early days. This work and my inspiration for it were drawn wholly off of procedures that he has been applying for many years — with my twist and discoveries interjected.

It is too bad we missed each other on Saturday, 23 September 1950 but I am sure as hell glad that we got together this time around!

The other is to Mary. Another woman that I have been fortunate enough to have graced my life with her presence. Our conversations are always

insightful and inspirational. Believe it or not; you helped me to work through many things.

Thank you both!

NEW ERA SCIENTOLOGY PROCESSING COMMANDS

1. "Can you locate a point of equilibrium regarding_____?"
2. "Is this your charge, another being's charge, or multiple beings charge?"
3. "I would like to indicate that this is (your, another being's, multiple beings) by-passed charge."
4. "Is this a point of equilibrium or unequilibrium?"
5. "Is that a point of equilibrium in matter, energy, space, time, or awareness?"
6. "I would like to indicate that it is a point of equilibrium in_____."

Or;

7. "Is this a point of unequilibrium in no-matter, no-energy, no-space, no-time, or no-awareness?"
8. "I would like to indicate that it is a point of unequilibrium in_____."
9. "Now spot the point of equilibrium in that again."

10. "Does that seem to have blown?"

(If not)

11. "Is there an e/s point of equilibrium?"

12. "Now spot the point of equilibrium in the e/s event."

[Then start again from step 2 and continue.]

The procedure can be continued until a Minor EP (f/n, a small self-realization, and v.g.i's), EP (f/n, with a cog related to the subject with some resolution, and v.g.i's), or MAJOR EP (f/n, with major realization of the subject being run, the achievement of Universal Basic with complete certainty of resolution, and v.v.g.i's).

Ultimately we are aiming for the latter, but the rest will do when faced with time-constraints or other circumstances. An EP can occur at any point in this procedure and if it does that is the point to leave off. Unless it is a minor EP and there are no barriers in auditing towards a MAJOR EP.

Another thing to note here is that at the same time a read occurs on the meter it is corresponding to the point of equilibrium in the pc's mind or universe. So if they have any difficulty in locating one, or when repetitively spotting one; then indicate a read no matter how small. It can be as little as a tick or a stop of the needle; but once indicated it tends to open up the dial and whatever is being run.

So you cannot go wrong in indicating these as long as you never cut the pc's communication in the process.

So there you have it! These are the most workable set of NEST commands and will produce case gain on the order of three-to-four times the amount of previous auditing. The wins and gains are also stable, and if a MAJOR EP is obtained, then you can add certainty to the mix.

Best of luck and this is the most potent tech that we have to date. So use it to the benefit of yourself and others — that is the real ticket.

HCO BULLETIN OF 15 NOVEMBER 2018R

REVISED AND REISSUED 16 JANUARY 2019

supersede
pilot process
all auditors
public distribution

As of this date, the previous version of these commands found in HCOB 15 NOVEMBER 2018 have yet to be canceled and are considered valid.

NEW ERA SCIENTOLOGY PROCESSING COMMANDS

1) “Who or what is opposing_____regarding yourself?”

(Or “Who or what is opposing_____regarding another?” and “Who or what is opposing_____regarding others?” when running all flows.)

Any person, place, or thing can be used here from the PC, or any item from any worksheets, lists, or even from another processing command may be incorporated as well.

a) “How would you describe that in a few words?”

The phrase that the PC originates is used in the next command and this repeated in all subsequent commands followed with the use of the additional question “How would you describe that in a few words.”

2) “Who or what was opposing_____?”

The use of this question again is used to establish *who* in an incident (discovered with step one of this procedure) is doing the opposing. If it is someone other than the PC, then get what the other person did with steps three and four because it is not the PC’s.

a) “How would you/they describe that in few words?”

3) “What was done by you/them to oppose_____?”

a) “How would you describe that in a few words?”

4) “Why were you/they opposing_____?”

a) “How would you/they describe that in a few words?”

5) “Is that all of this incident?”

6) “Is there an earlier/similar incident regarding_____?”

The final description from step 4a) is used here.

If the TA has risen then ask for an e/s incident but if TA is still being produced and discharged then go through additional times as necessary starting from step 1.

Only go e/s if things begin grind or the TA goes flat on step 6.

Continue until a full DIANETIC EP — including erasure and postulate gotten off — in the universal basic area is achieved.

The data on this area can be found in HCOB 16 JANUARY THE
OTHER SIDE OF THE VEIL.

L. RON HUBBARD

by L. Ron Hubbard
ALL RIGHTS RESERVED

The ORIGINAL ASSESSMENT is done the first time through, all of the way, with each major sub-set of case (communication, problems, ethics, ARC, and Conditions) against all of the nine dynamics to determine which one is reading the best.

The one that does is the entry point into a pc's case and is the Dynamic that needs to be addressed first.

We then further assess the hottest reading Dynamic with the following commands.

“What unbalances of (major case factors) are connected to your (best reading Dynamic)?”

List the question and the pc's answers on a separate sheet and note reads of each including F/Ns.

It is very important to remember that F/Ns are considered valid read in NEST, just like an instant read in Dianetics, and that an F/N takes precedence over a fall when assessing.

These items are then preassessed using HCOB 16 NOVEMBER 2018 — NEW ERA SCIENTOLOGY PREASSESSMENT LIST and run with the latest NEST procedure to date, which can be found in HCOB 15 NOVEMBER 2018R — NEW ERA SCIENTOLOGY PROCESSING COMMANDS.

If for instance the first Dynamic was found to be reading the most and was further assessed (on communication) and then preassessed and run with NEST, we would then come back and do this on the first Dynamic with each successive case factor.

Once this is done, we then repeat the original assessment on each additional Dynamic based upon the reads gathered in the original assessment.

L. RON HUBBARD

THE OTHER SIDE OF THE VEIL

A THEORETICAL EXPLANATION FOR THE CREATION OF THE
PHYSICAL UNIVERSE AND THE PRINCIPLE INCIDENT FOUND ON
ALL CASES THAT IS RESPONSIBLE FOR THE FORMATION OF THE
REACTIVE MIND

The data that is presented here is purposefully vague so that those who run into this incident or attempt to audit it out, will not have any of the detailed information that I have managed to collect on this over the last twelve months. In this way, each person can see the truth of this for themselves and independently verify more detailed information on it that is planed to release in the future in book form.

I have chosen to do this so that none of the results achieved or data collected in auditing session can be tainted or have any doubt cast upon them.

The content of this is so unbelievable and contradictory to what humankind has been taught for millennia that it may be next to impossible for someone who doesn't experience it in session to believe that it is real. It may be the actual story of how our universe was created and why we have ended up here, and this could be too much for some individuals.

But more importantly, this may change the way we audit and address individual cases forever. For with this incident we would have in our possession the first implant ever created — which we were subjected to — ultimately forming the basis of our reactive mind and everything as a result of it after that.

It further means that every difficulty, problem, or aberration that we have in PT is traceable back to this area.

The area of a case in which this took place is done so using the latest version of NEST and is a bit difficult because the area has no *time*.

So it will be necessary to match what is going on in a session with the data that is provided here if it is suspected that the area has been reached.

It can then be dated and located because once it is experienced in PT it can then be assigned a relative time.

The whole entirety of this incident is approximately 100 quadrillion years long, and the sequence is as follows.

1. Between 750 – 800 quadrillion years all thetans were compulsively mocking things up in a state of insanity as a result of the Big Bang (creation of the universe via a white hole)
2. (The Big Bang) 800 quadrillion years ago is the approximate time in which the Big Bang took place. With a massive explosion and the feeling of traveling down either a white or black tunnel on which the other side is the universe we find ourselves in now.
3. Between 800 quadrillion (The Big Bang) and 825 quadrillion year ago contains the “emerald city” or “city in the sky” and is a giant space station/city that floats in space. There are numerous advanced humanoid and non-humanoid races, a council of galactic senators, and a decision to put everyone through “portals” to go to the other side.

4. Between 825 and 850 there is war, destruction, and the formation of black holes all over this universe as it began to decay.

In any part of this incident or series of events can be a universal basic on a chain, but the keynote is that the last life lived or experienced before the Big Bang is the one that set the standard of all that would follow on up to PT.

It is what has defined who and what we are now.

Run it and find out for yourself.

INCIDENT ZERO DEBRIEF

Due to the widescale application over the last year of this data — and that it appears to be present in every individual case — it is time to give a more in-depth description and explanation for what has been termed Incident Zero.

It has been named this because it is the precursor to incidents One and Two — that are run later on the Bridge — at OT III.

So aptly this would be called Incident Zero as it comes before both of these — and not being discovered until now — can be considered to be retroactive.

Unlike the other incidents — that are only implants and take place over a short amount of time — this “incident” is a whole entire series of events that took place over a period of approximately one-hundred quadrillion years.

Now to avoid any confusion — I will start at the beginning and move forward — retrospective to present time.

This series of events began about eight-hundred and fifty quadrillion years ago — and in the universe that existed before this one.

With this universe being almost completely the same as our own — with the exception that they had quadrillions of years to develop and become technologically advanced — far in excess to what we see today.

The whole entire universe was controlled and governed by an “intergalactic confederation” — headed by thirteen senators who resided in the central galaxy of the universe — and were the heads of households of what we consider in this universe to be “extraterrestrial” lifeforms.

These households were further composed of four major subdivisions of biological beings that were more prone to survival and evolution — than other species.

There were humanoids, insectoids, reptilians, and avian-based biological lifeforms — with many other subspecies and hybrids in-between — with the actual senators themselves — being spiritual terrestrials.

Now there is no need to go into the full details of this because I will probably do it elsewhere — and the rest is best left for session — but is given here to provide a general background and idea of what one will run into in respects to this incident.

At the point of approximately eight-hundred and fifty quadrillion years ago — the previous universe began to deteriorate and degrade — to the point that it was then dying and on the brink of total destruction.

Which will happen to any given universe if it exists long enough — because as its stars begin to go supernova and form black holes — it will eventually end up with an overall gravitational force that culminates in what is known as a white hole (Big Bang).

For the next fifty quadrillion years — there were ongoing wars with different factions and divisions struggling over dwindling space and resources.

As the intergalactic senators stood by and did nothing — because having obtained ascension (becoming spiritual terrestrials) they had obtained a state

in which they could never die — and believed themselves to be immortal and indestructible.

In the process of this — the Araknian home world was destroyed due to the inaction of these senators (Araknians were giant spiders of the insectoid family — and were the best technologists of their time).

With the only survivor being Lord Araknus — who was the thirteenth senator and the head of his household.

He was also the individual responsible for the technological breakthroughs that made the transition to spiritual terrestrial possible (a process that was closely guarded and only known to the senators themselves).

So fast forward to eight-hundred quadrillion years ago — and the whole entire universe had now taken refuge in center of the universe (hoping somehow the senators could do something to save them) — in what was a floating or what some refer to as an “Emerald City”.

The senators then came to Lord Araknus for a solution — as he was the high technologist and the only one left alive — that could potentially save them all.

He did come up with a solution to the problem that would have beings sent through time warps — and past the point of the destruction of the prior universe — and into the next one — but the senators wanted to abuse this by only allowing individuals through that fit certain qualifications.

With the only downside to utilizing this technology being if an individual was not allowed to go through one of the time warp portals — they would be driven insane as a being in the process of going through the white hole — at the universe’s eventual destruction.

Having lost all of his own people — Lord Araknus could not allow this to happen by following their orders and decided to take another action entirely — but was found out before he was able to carry it out and imprisoned.

He had decided that he would detonate an antimatter bomb which would precipitate the white hole they were all trying to avoid — and even though it

would drive all the beings insane in the process — they would survive and precede to the next universe with an equal chance to create and thrive.

Twelve other beings from the individual households then assisted him by breaking him free from his imprisonment — and fought their way into a high security area — in order to detonate the previously mentioned antimatter bomb.

In conjunction with this — the senators began implanting the lesser citizens under martial law by having them all go into their equivalent of movie theaters — and watching images on the screen while being covertly sprayed with gas that would euthanize them.

This was done so that nobody would remember what had been done to them at a later date — as the senators would be immune to the effects of the Big Bang — and believed they would continue to reign supreme in the following universe.

But Lord Araknus was successful in his endeavors with the help of his friends — and everything and everyone was then sucked into a giant black hole that turned to a white hole — and spewed everything out the other end.

Causing all beings to go insane for another fifty quadrillion years — making them compulsively and forcefully — mock things up in the process.

Creating what we know as our universe.

There ARE some points that should be noted about this incident:

1. The exact point a being was at just before being pulled into the Big Bang — is the same point at which their reactive mind is formed.
2. Running somebody down into this area with any auditing methodology (Technique 09 is recommended) to the point to where they detach from their reactive mind — will achieve a state of Stable Clear.
3. If this is not done — a being will mock-up a reactive mind again — even if they have already gone Clear or beyond on the Scientology Bridge.

4. The Big Bang is an electronics incident — and therefore the whole entire physical universe is an electronic implant — and should be handled accordingly.
5. This is the reason why auditing was only so effective in the past — as the electronics phenomena needs to be handled in incidents — for them to completely erase.
6. The thirteen senators are alive and well today.

Having escaped the effects of the Big Bang — they have resurfaced and disappeared many times throughout this universe's almost endless history — affecting civilizations to a greater or lesser degree.

Since they no longer have their ruling households — or at least biologically and organically — they control people by what is known as spiritually (on a theta-line basis).

7. All life and beings — including all the laws and rules that govern the physical universe — have been mimicked this side of the big bang and in this universe.

And while we can break outside of and overcome some of these constraints — it is only possible to a limited degree unless a very large number of beings are able to break general reality.

Which means that if we all do not ultimately make it — then none of us will.

8. The same exact pattern has been repeated on multiple occasions and in multiple other previous universes.

Many refer to these other iterations of the same pattern — as eternities.

9. Being that we now know and understand this data — and that we know it this early on in the cycle of the universe — we have the unique opportunity to be able to develop the technology and infrastructure

necessary to break free from the trap.

10. The previous universe is the relative beginning of creation as we know it — and is the true story behind all the great philosophies and mystical practices throughout the ages.

In those practices and stories can be found bits and pieces of it — and in everything that we see around us.

It is the ultimate truth, salvation, and reason why we find ourselves here currently.

SCIENTOLOGY 09 — INFINITY TECHNIQUE

NEGATIVE PLUS-MINUS PROCESSING

What you are about to read is the single most powerful and far-reaching form of processing I have ever developed. It is the full accomplishment of what I had attempted to do with Infinity Procedure, and that is to develop a uniform method of auditing that would apply to all case levels and auditors — no matter their training or case level.

It is based upon certain factors that until approximately ninety days ago were completely unknown to myself and the rest of the field. They include the Unification Principle, the behavior of a static above tone 40, and the understanding of the other half of the tone scale itself.

Another important factor is that I now know how to uniformly audit above or beyond a floating needle, which unbeknownst to myself and many others, was an actual liability in auditing. Apparently, this was because most auditors in the field failed to realize that a floating needle only indicated charge key-ing out and not fully as-ising or erasing.

Which means that not only were things keying back in on the majority of cases but scientologist were beginning to mock up their entire reactive mind again — albeit slightly different than before but more insidiously.

Before you get all out-of-sorts about this, please realize that it has a simple solution with this new form of processing and does not mean that everybody is going to have to retread and retrain themselves.

THE TRUE ROUTE TO OT

Armed with this new data we now have a form of processing which I will be referring to as Negative Plus-Minus Processing until further notice.

The simple theory behind it is that you take something that is unwanted — anything at all — and then you discover whether or not it is considered to be positive or negative in the viewpoint of the pc or pre-ot. Once that is accomplished, we then ask them for the opposite of what they said was either positive or negative, which causes it to discharge. At which point they are usually F/Ning on the meter — but we do not stop there.

We then ask for something that is positive and negative, alternately, until a blowdown occurs and the needle goes null. There is no ep, there is no cognition, and there is no floating needle to be seen anywhere in sight. It is an entirely different form of an ep, and the pc or pre-ot will have raw ability returned to them instead of a simple realization.

Now, this may be difficult for some to accept because it is slightly contrary to what we normally do in auditing, but you are free to see the results for yourself.

In personally running this on myself — within two one-half hour sessions — I had my complete native writing ability restored, amongst selective recalls of last lifetime, which were up until this point completely lacking. So believe me when I say that this is some dynamite stuff that can change your life beyond anything you have ever seen before.

In all of my years of doing this, I have never seen anything like it.

So now let's get into the actual full theory behind this: so that we can ensure it is run properly in the field.

HOW THIS FORM OF PROCESSING IS USED

What you need to understand from the outset, is that there is no rote way to utilize this form of processing and it is such a far-reaching and all-encompassing technique, that it is more of an art form than anything else.

Which I must say, does quite remind me of the earlier days of Dianetics where our auditors actually had some tact and skill that they utilized in an auditing session — instead of doing training routines.

In any event, this technique can be utilized and incorporated with any former or valid form of processing, command, or procedure.

It will be up to you to use judgment and discretion when choosing when and where to use this technique. It has the potential to be utilized anywhere on the bridge as long as it does not interfere with or detract from other major bridge actions.

We start with any reading item or major process and then check the pc or pre-ot for interest.

Then you simply query whether or not they consider this to be positive or negative and use it as a major running item.

It is important to know that when checking for reads on the meter you use both the suppress and invalidate buttons. In addition to this, there is a new button that we will be utilizing, and it is "Static."

So, after you check for suppressed or invalidated you then ask, “on (whichever item) has anything remained in static?”

If you get a regular read that is great, then you will just proceed accordingly, but it should be noted here that if something is remaining in static the needle will be floating and this is not what we are looking for. This is indicative of charge remaining in an incident or on an item above tone 40 on the tone scale, and thus it does not read but only has become keyed-out and was never run in the first place.

This ties into something I mentioned approximately six months ago on how we had never actually run our own static case before. It is difficult to run as you have to use a collection of surrounding factors and indicators to determine if you are as-ising static charge or not. Meaning, that theoretically there are forty additional points on the tone scale that exist as pure experience which are representative of assimilation, empathy, interchange, and awareness — which is composed of all three combined.

This data can be located in HUBBARD COMMUNICATIONS OFFICE BULLETIN APRIL 2018 REVISED AND REISSUED — ASSIMILATION — EMPATHY — INTERCHANGE in part and will provide the basic understanding of the function of a static above tone 40 on the scale.

To bring it back to our example and how to run this in session — once you have a read and have established with the pc or pre-ot whether or not it is positive or negative and they have interest in running it — simply ask them for the opposite. So if it was positive from their viewpoint ask them to “tell me something negative about that” where if the response were negative you then ask, “tell me something positive about that.”

You continue this until a BD F/N is achieved and very good indicators are demonstrated. At which time, you then ask for both positive and then negative things about whichever item is being run until there is another BD and the pc or pre-ot displays extremely good indicators.

Now, this is the important thing to note that when the needle blows down upon asking for alternate positives and negatives, the needle will be seen to be *one hundred percent* clean and rising to the left on the meter. It will be a clean and null needle without a single hitch or start in it.

So, for the purposes of Negative Plus-minus Processing, a floating needle can be considered to be a “static-fall” and null needle directly after a BD is run could be considered to be a “static F/N.”

To sum this all up. Take any major reading process or item and find out whether or not it is considered to be positive or negative from the perspective of the person you are auditing and then you ask them to tell you something that is the direct opposite of it until a blow BD F/N occurs.

You then ask for both positive and negative things about the major reading item or process until a BD Null occurs.

There will be extremely good indicators, and you will not fail to notice the difference between this type of ep and a standard one.

THINGS THAT YOU CAN EXPECT TO ENCOUNTER

I do not want to disillusion you because this form processing is so powerful that it can be a little bit rough at times — especially if being done solo but a lot of that can be avoided if one assigned plenty of significance as they go along in a solo session.

When being delivered, I have not seen too many liabilities; however, some uncomfortable somatics, emotions, and other masses have been known to key-in while running this.

We used to always say, “when in doubt remedy havingness” and that is just as true today as it was then.

If you run into any difficulty with this processing, then ensure that you remedy havingness and you have discovered someone's particular havingness process by utilizing the pre-sessions if you are auditing another.

I have found it helpful to do it after every few items that have blown as well as before ending off a session. It will prevent the individual who you have just given a session to from going out and sucking in unwanted masses and seedy characters — I have seen them come out of the woodworks on people after doing this process.

You can see this occurring on the meter every time something blows down and erases statically because the needle will begin to rise to the left and not come back in the other direction while the TA will be slightly below the clear read for that individual.

It is because they are sucking in masses trying to compensate for what they have just blown in session.

It is important to note this because another good thing that you can expect is that between sessions your pc or pre-ot will stay completely keyed-out and also begin assimilating additional masses on a large scale between sessions. Which means fewer repair activities overall and not having to be largely concerned with things such as Ruds and ARC Breaks.

Also, you should hat them on an objective version of their particular havingness process in case they do suck in any unwanted masses between sessions. They can then remedy their own havingness which will ultimately cause these to blow as well.

Conclusion

As to the rest, it will be up to you and your tact as an auditor to apply this new technique in the field. Experience and diligence will uncover any further fine points on running this, but as it stands, it is a highly workable form that produces unheard of results.

Please use it to the best of your ability and to the benefit of yourself and others.

*ADDITION TO HCO BULLETIN OF 2 MARCH 2019 SCIENTOLOGY 09 —
INFINITY TECHNIQUE*

ADDITIONS TO TECHNIQUE 09

Alright — in the process of applying Technique Infinity on a cross selection of all types of cases — there are a few refinements to take notice of. I have personally found the following commands and methods for running the technique to be the most workable, far-reaching, and productive of the greatest case gain.

Below — is a diagram that will help you to familiarize yourself with these commands — and to keep track of them on your worksheets as you are processing your PC's.

MEST = A is an acronym for matter, energy, space, time, EQUALLING awareness — and is the bracket that is utilized for each of the four points on this diagram. The two on the left-hand side stand for positive and negative — while the two on the right-hand side that are circled — stand for static and anti-static (static that is NOT there or present).

So — after establishing whether or not an item is positive or negative per HCO BULLETIN OF 2 MARCH 2019 SCIENTOLOGY 09 —INFINITY TECHNIQUE — simply start with the opposite (for instance if the item was positive then begin with a negative) and then ask for what positive or negative matter, energy, space, time or awareness is connected to the item or incident being run.

Then simply follow the lines of the infinity symbol on the diagram — and run the static opposite. In this case — since negative was run first — what static MEST = A was connected to the incident or item. Followed by what static MEST = A was *not* connected to the incident or item — and finally ending with positive MEST = A that was connected to it.

This is continued until the full EP is achieved that is outlined in the above HCOB. It is usually only necessary to go through this entire bracket once to do so with each individual item — but on occasion — it can take two or three.

TECHNIQUE 09 (A) COMMANDS

The commands for the above diagram are as follows:

POSITIVE:

- What positive matter is connected to that?
- What positive energy is connected to that?

- What positive space is connected to that?
- What positive time is connected to that?
- What positive awareness is connected to that?

NEGATIVE:

- What negative matter is connected to that?
- What negative energy is connected to that?
- What negative space is connected to that?
- What negative time is connected to that?
- What negative awareness is connected to that?

STATIC:

- What static matter is connected to that?
- What static energy is connected at that?
- What static space is connected to that?
- What static time is connected to that?
- What static awareness is connected to that?

ANTI-STATIC:

- What static matter is not connected to that?
- What static energy is not connected to that?
- What static space is not connected to that?
- What static time is not connected to that?
- What static awareness is not connected to that?

TECHNIQUE 09 (B) COMMANDS

The following commands are utilized to address the composite case:

- What are you trying to accomplish?
- Can you locate another separate being that is connected to_____?
- Ask them “how are we connected?” (Multiple times if necessary).
- Ask them “what have you been doing to me regarding_____?”
- [TECHNIQUE 09 – A Is run on the item in the previous step. With the commands being asked of the being via the pc.]
- Are you now willing to help me with_____? (Original item).

If necessary — this is gone through multiple times until the being is in full agreement with the pc and is willing to help them.

FURTHER ADDITIONS TO TECHNIQUE 09

TECHNIQUE 09 – C

The Methodology and Technique for Handling Direct Physical Universe Charge — and Terminals

Due to the whole-scale application of Technique 09 over the last few months — I have made one small amendment — and have added an additional portion to — the procedure.

This addition to the procedure — is Technique 09 – C.

This is done in a concerted effort to make this whole entire procedure — all three parts of it (Technique 09) — as easy to understand and run as possible.

The minor addition — is that instead of running plus and minus with any version of the procedure — it is being replaced by running black and white.

Instead of running and asking for a positive — you simply have the pc turn whatever they are looking at — or viewing — white

And instead of running and asking for a negative — you have the pc turn whatever they are looking at — or viewing — black.

This is done to account for lower-level gradients — and to make it possible to access the data — and perceptions — that are necessary to then run the other portion of the procedure on an incident.

Which is essentially running off postulates at a higher level on the tone scale.

What we are doing here — is taking an incident and running black on white on it — until all of the data blows in to view that is necessary — to pull the postulates from it.

Bringing the incident up through the higher levels of the tone scale — and in the process — the static-band.

This inadvertently causes a pc to spot the point of equilibrium within each incident — and as-is it fully.

That being said — some new phenomenon and data has come to light — in the process of running this.

Which gives insight on the reason why so many cases have had difficulty in becoming OT.

Namely — obtaining exteriorization with full perception.

It appears — that this is a direct result of being condensed as we come down through the tone scale.

As a static — at the top of the scale — we can be considered to be omniscient and omnipresent.

Then — as we begin to make our own postulates and put out our own space — via dimension points — we gradually begin to mix-up and misidentify with — the postulates and dimension points of other beings.

Causing — what we consider to be a composite case.

This closely monitors the tone scale, be-do-have triangle, and all other relevant Scientology phenomena — at that case level.

It is a progressive and gradual reduction in awareness — and ability — to have things.

With the belief — that the being is now a part of this collective whole or game — when in reality — they are separate from it — and always have been.

This state is not quite as severe as being located within a body and reduced down to that singular viewpoint — but it does come with its own trappings and difficulties.

After a being has identified with a game for so long — it begins to become sympathetic — for certain terminals and things — especially bodies.

At which point — the being then fully becomes — and identifies with — a body.

This is just a brief overview — and is not meant to cover all of the individual and minute details — but will give a general idea of how this occurs.

Demonstrating — that there are three degrees of charge — that affect us within the physical universe.

They are first-person charge, second-person charge, and third- person charge.

More accurately — being labeled case, composite case, and physical universe case.

The important thing — is whether or not a pc has the raw ability to confront these areas of a case.

This seems to be the only determining factor on how you program — and run — a case.

While taking into consideration — what the individual wants to handle.

There are also different degrees of case gain — and wins — that correspond to these different areas.

With progressively more gain — as you go up through the three.

Now — we already have procedures that cover the first two with Technique 09 – A and Technique 09 – B.

I will be presenting the third here now — Technique 09 – C.

The sole purpose of this procedure — is to directly address physical universe charge — and terminals.

In a way — this will be very familiar to the technology that can be found in *The Creation of Human Ability* — but is catered towards infinite case gain — and application.

TECHNIQUE 09 - C

First — it will be necessary to present a couple of new definitions here — but they are very basic and intuitive.

NODE A singular unit — or terminal — of matter, energy, space, time, or awareness — within the physical universe.

These can be individual particles — or a whole collection of them (in the case of the formation of an engram or facsimile).

NEXUS A collection of two or more nodes within the physical universe — that are grouped — and classified — within the same category.

For instance — a collection of MEST – A nodes — would be a nexus.

Not a collection of mixed-and-matched nodes — that are composed of MEST - A.

Now — you can use the following command in step one of this procedure — or you can incorporate any major grade process — or question — as a substitute.

1. *“What about yourself — or the universe — would you like to handle?”*
2. *“Can you locate a nexus of matter, energy, space, time, or awareness — that is connected to that (running item)?”*
3. *“Is this a nexus of matter, energy, space, time, or awareness?”*
4. *“Can you locate a node — that is connected to this?”*
5. *At this step — Technique 09 – A commands are used — to as-is — the node obtained from step four.*
6. *Step four — is then repeated until there are no more nodes that are connected to the nexus — in step two — and the nexus has as-ised.*

This is — of course — by no means a rote procedure — and this will take a lot of tact on the part of the auditor — to pull off.

But — once you do — you cannot mistake the case change and end phenomenon of this procedure.

In auditing this procedure — I have seen a nineteen division LFBD on the meter — which I have never seen before.

What you want to do here — is query the PC and discover a nexus that is connected to any major running item — that has charge — and then run every single individual node — that is connected to that nexus.

Utilizing Technique 09 - A.

Keeping in mind — that positive and negative — have now been replaced by black and white running.

Now — a few additional points.

I have discovered — an entirely new end phenomenon — by auditing with this procedure.

I will be writing it up in a separate bulletin — but will provide the basics of it here.

1. *Never allow a PC to walk away from a session — having cognited — WITHOUT a subjective reality on what has just been run!*

This means that every single time — you must be absolutely certain that you allow a pc to cognite — with a direct correlation and reality — on what they are running.

For instance — if the process Remember Something is being run — the only cognition you let the pc off the hook with — is one in which they originate that this is the reason why — they have been having difficulty with their memory.

Same cognition — but with a correlation — to direct cause-and-effect.

2. With all the data I have seen for sessions on this procedure — a full EP occurs — once the incident that keyed-in the difficulty or item — is discovered.

There is usually one incident that is in present time — another that is along the wholetrack — and one that can be found in the Universal Basic — or Incident Zero area.

The data on Incident Zero — and how to run it as of this date — can be located in **HCO BULLETIN 16 FEBRUARY 2019 — THE OTHER SIDE OF THE VEIL**

3. The PC having originated — that they have exteriorized from the incident, terminal, or charge — that they are running.

That is just how it sounds — it means that they have fully disconnected — and exteriorized from — whatever they were interiorized into.

This is usually accompanied by stating — that they now have the capability of seeing the whole sequence of events — or the three incidents mentioned above — laid-out before them.

This all still accompanies a floating needle — but the major factor here is — that cognitions are replaced by subjective-cognitions.

Whether this applies to the whole entire Bridge — and the rest of the technology — is yet to be seen — but the upside of concentrating on subjective-cognitions — is that we can never again mistake a true end phenomenon.

Locate a nexus based upon a major running item — then run off all the nodes that are connected to it — until the full ep mentioned above — with a subjective-cognition and exteriorization — is achieved.

And you will knock some tops off!

I cannot begin to go into the depth — and reach — that this form of the procedure has — as I would be here for the next thousand years trying to explain it to you — but am more than happy to let you find out for yourself.

Though shortly — I will be writing another book on all of the theory — that underlines this.

In the meantime — use this to make some noise.

A lot of it!

THE LAW OF UNIFICATION

It can be described as follows:

At any point in time where a person or an object (or multiple people and objects) have a mutual impact in common — that has enough force to produce any pain, unconsciousness, or discomfort — there is a point — if only for a fraction of a second — where all opposing forces will equal zero — and a total equilibrium or balance will occur.

Simultaneously — creating a static force that has a complete *absence* of matter, energy, space, and time — but is infinite — and has all the *potential* qualities of matter, energy, space, and time.

(Also known as MEST.)

Therefore — following the *Law of Conservation of Energy* (the theory where nothing in our universe is destroyed but just alters its form and becomes something else) the destruction of any MEST will forever exist — in potential

— as a static that parallels — and contains — all of the initial forces of the moment of the original impact.

THE INVERSION PRINCIPLE

There is another principle that corresponds to the Law of Unification that I have been cooking up — but was unable to release until now.

It is the Inversion Principle and can be stated as such:

Any unit of matter, energy, space, time or awareness — once created or destroyed — simultaneously and instantly creates a negative potential of one unit of matter, energy, space, time, or awareness — that is directly proportional to the original unit at its moment of creation or destruction.

This seems to be the very mechanical means of aberration itself — that in having created or destroyed something we have to compensate for that somehow — and in some way.

And there is going to come a time when we cannot — as spiritual beings — keep pace with this and bam!

We become the cause of our own effect.

Pretty simple — really.

You burn a log — so now you have to worry about replacing that log or you will freeze to death.

You go about this for 50 years and one day forget to chop wood to replace what has been used — and you freeze to death that night!

I don't know what the applicable means for countering this are yet — but once we do — it will be a wonderful tool.

Although it is an inherent part of all cycles of aberration.

**INTELLIGENCE AND THE ASSIGNMENT OF SIGNIFICANCE
IN DIANETIC AND SCIENTOLOGY PROCESSING**

I believe that after all of these years I can adequately answer *why* all form of Dianetics and Scientology processing work. Conversely, this would theoretically also explain at what point that processing breaks down and does not work so well.

FOR ANALYTICAL THOUGHT TO TAKE PLACE AND AN AS-
SIGNED TO OCCUR A SIGNIFICANCE *MUST* BE ASSIGNED TO AN
UNKNOWN.

You may notice that this is one of the rare times in my writing I have used the word *must*. I have done so to stress the importance of the role that this small little datum plays in all of what we do.

No matter what type of auditing is being delivered the additional step of merely asking a PC “How would you word that?” appears to have the effect of increasing the power and the efficiency of processing by 80%.

Anything that cannot be viewed is an unknown, and it will remain that way until it is viewed and a significance is assigned to it that is based upon the reality of the person viewing it.

Roughly 95% of the universe is composed of dark matter and energy while only 5% of what we term as matter comprises the rest. It appears that this also corresponds to mental mass and energy as well, meaning that 95% of our awareness and potential exists as anti-matter or a black matter that we have just begun to tap into.

It is in this state because it is an unknown and it is only necessary to assign significance to it for us to increase our awareness level.

So if a guy is being audited that has been hit over the head with a rock, it is important to ask him how he would word what has occurred to him. While in just mechanically going through it, he may say he was hit over the head with a rock, while on further inspection by query from the auditor, he may say that he was struck with a “stone.”

This one little inaccuracy is the make-it-or-break-it point and is the balance between significance and havingness that makes any process work.

Give it a shot, and you may be amazed at the results. I have recently incorporated this principle into a series of Expanded Grade V processes so that anyone may see for themselves in the field.

supersedes

all auditors

all case supervisors

general distribution

This version of Technique 09 — as of this date — is considered to be the final version of the procedure and is to supersede all other versions.

NEW ERA SCIENTOLOGY RUNNING BY CHAINS

Technique 09 — Revised and Reissued

Alright — so I have finally managed to work out all the kinks with Technique 09 — and reduce it down to an easy to use and workable procedure for any level and degree of case.

BLACK AND WHITE

Given the recent discovery that the whole entire universe is in essence — an electronics incident and implant — then the first step of any form of this procedure is to run black and white.

It is the first thing that you will want to do.

You simply have the individual that your auditing turn whatever they are looking at — or viewing — black and then white.

This is done back and forth on an alternate basis — until they go up through the tone scale and originate a postulate.

At times it can be observed that they will experience a somatic or effort which will then lead to emotion turning on and discharging — such as grief — up through hilarity to the origination of a postulate itself.

Although this can happen in whole or in part — the important thing to do is to get to the postulate itself — at which time the additional commands of Technique 09 (A), (B), and (C) are then used.

TECHNIQUE 09 (A) COMMANDS

1. *“What matter are you connected to in this?”*
2. *“What energy are you connected to in this?”*
3. *“What space are you connected to in this?”*
4. *“What time are you connected to in this?”*
5. *“What awareness are you connected to in this?”*
6. *“What about this should not have been?”*
7. *“What about this should have been?”*
8. *“What is the point of equilibrium in this?”*

TECHNIQUE 09 (B) COMMANDS

[IMPORTANT NOTE]

The following commands are not only used to address the composite case — but they are also used as a substitute and in place of the “another” flow.

Once a being has been located — or by using some variation of — “can you locate a sperate being that is connected to (major running item)?”

- 1. “Ask (them/him/her) what have you been doing to me because of this?”*
- 2. “Ask (them/him/her) what matter are you connected to in this?”*
- 3. “Ask (them/him/her) what energy are you connected to in this?”*
- 4. “Ask (them/him/her) what space are you connected to in this?”*
- 5. “Ask (them/him/her) what time are you connected to in this?”*
- 6. “Ask (them/him/her) what awareness are you connected to in this?”*
- 7. “Ask (them/him/her) what about this should not have been?”*
- 8. “Ask (them/him/her) what about this should have been?”*
- 9. “Ask (them/him/her) what is the point of equilibrium in this?”*

TECHNIQUE 09 (C) COMMANDS

[IMPORTANT NOTE]

The following commands are used as a substitute and in place of the “others” flow.

Once a node that is connected to a nexus is located.

1. *“What physical universe matter is connected to this?”*
2. *“What physical universe energy is connected to this?”*
3. *“What physical universe space is connected to this?”*
4. *“What physical universe time is connected to this?”*
5. *“What physical universe awareness is connected to this?”*
6. *“What about this should not have been?”*
7. *“What about this should have been?”*
8. *“What is the point of equilibrium in this?”*

THREE DIVISIONS OF EARLIER-SIMILAR

Any of the above versions of the procedure are run:

EARLIER SIMILAR (E/S) from present time to the basic-basic in the prenatal area.

EARLIER LIFETIME (E/L) any earlier and individual lifetime on the whole track — from last lifetime until the Big Bang.

EARLIER UNIVERSE (E/U) any earlier incident from the Big Bang to Incident 0.

The last is our ultimate goal with processing and New Era Scientology — as it is the Universal Basic area (where the individual Reactive Mind is formed) — and is the point where anything will As-is completely.

You get a major running item or incident — and then use the corresponding version of the procedure to handle that particular area of case — and then go earlier-similar, earlier-lifetime, and earlier-universe until a full EP occurs.

The same applies to composite case beings as well. They are run just the same as if they were in front of us — in an actual physical session.

The end phenomena of New Era Scientology is F/N, V.G.I's, EXTERIORIZATION, and SUBJECTIVE-COGNITION.

This always takes place in the Universal Basic area.

THE THREE DEGREES OF CASE

There appear to be three separate degrees of case that have their own similar — but unique handling.

They also correspond to three individual sets of the Nine Dynamics (1-3, 4-6, and 7-9).

They are:

INDIVIDUAL CASE: this is all charge and case handlings from the first-person perspective — for example — engram running by chains.

COMPOSITE CASE: this is all the charge and case handlings from the second person perspective of another **SEPARATE** being — not to be confused with running Body Thetans or Clusters — but getting the actual subjective reality and data on another being's motivations for doing — or causing something.

Which in turn — will reveal our own interaction with this being — and the reason it affects our individual case.

More in-depth data can be found on this in HCO BULLETIN 13 OCTOBER 2018 — SUBJECTIVE-OBJECTIVE (SUB-O) PROCESSING.

PHYSICAL UNIVERSE CASE: this is all charge and case handlings from the third person perspective.

Each one of these degrees of case is handled with the versions Technique 09 (A), (B), and (C) — in that order.

INDIVIDUAL case is addressed with Technique 09 (A) from raw PC until a stable Clear (done by running engrams by chains with NEW ERA SCIENTOLOGY).

COMPOSITE case is addressed by running nothing else after Clear except Technique 09 (B) until this can be done so easily — until the physical universe begins to impinge upon the individual and key them in directly — without the mechanisms of the reactive mind and composite case.

PHYSICAL UNIVERSE case is then addressed using Technique 09 (C).

Not following this general guideline — and cross-mixing these case handlings — will only lead to overall and future difficulties.

*IT IS RECOMMENDED THAT THIS BULLETIN BE INCORPORATED
INTO ALL AUDITING PRACTICE AND PROCEDURE — UNTIL
FURTHER NOTICE*

SUBJECTIVE COGNITIONS

It is of fatal importance to ensure that a pc has a subjective-cognition — in conjunction with — every single end phenomenon in Scientology and Dianetics.

I cannot over-emphasize this point enough — as making this mistake — is as bad as putting a gun to a PC's head — and pulling the trigger.

They will not only fail to receive any case gain — but their case will become markedly worse — as time progresses.

What is meant by a subjective-cognition?

Simple — it means that a PC establishes a subjective reality between his cognition — and a present time difficulty — based upon the subject matter of a processing session.

If problems are being run in session — the pc will have a direct cognition on why they are having a problem — or that *particular* problem.

When communication is being addressed — a pc will have a cognition along the lines of — this is why they had difficulty with communication — or communicating on a given subject.

It is a direct A to B — or cause-and-effect — cognition.

From something that occurred along the whole track — to what is affecting them now in present time.

It is almost unnecessary to state this — and it was always implicit in auditing anyway — but there are a surprising number of individual auditors who do not understand this thoroughly.

I have seen an auditor call a communications grade completion on a pc — who originated that they were hungry — and their needle happened to be floating.

So — always ensure that your PC's subjective reality — is directly proportional to — the cognition that they are having — and it is on the applicable auditing subject.

To not do so — is a great disservice to them — and will only cause more harm than good.
